- 1. Training Channels Section Section where you choose the EEG Channels for feedback.
- 2. **Software Digital Filter Order Sections** Section where you set the Digital Filter order. The higher the filter order, the more selective the system is.
- 3. Sum-Channel Mode Section Section where you set the Sum-Channel mode on or off.
- 4. **Acquisition Control Button** Click to enter the Acquisition Control Menu. You can also click the Acquisition tab at the top.
- 5. Atlantis Hardware Control Button Click to enter the Atlantis Hardware Control Menu. You can also click the Atlantis HW tab at the top.
- 6. **4-Channel Sum Method Section** Section where you can set the 4-Channel Sum Method to either Split or Combine.
- 7. **File Output Section** Section where you can choose what type of File Outputs that you would like to be created for review.
- 8. **Amplitude Scale Section** Section where you can set the Amplitude scale to either Peak-to-Peak or RMS.
- 9. Artifact Threshold Section Section where you can adjust the artifact rejection range.
- 10. Low Frequency Cutoff Section Section where you can enable or disable the Low Frequency Cutoff.
- 11. **Software Notch Filters Section** Section where you can turn on or off the Software notch filters.
- 12. **Visual Filters Section** Section where you can turn on a Visual Filter that displays the data with a filter of 1.5 34Hz.
- 13. **EEG Data Sampling Rate Section** Section where you can adjust the Sample rate you are collecting from the data.

- 1. **Hardware Environment/Notch Filtering Section** Section where you can adjust the Hardware Environment.
- 2. Hardware Emulation Mode Section Section to adjust the Hardware Emulation.
- 3. Low Frequency Cutoff Section Section to adjust the low frequency cutoff.
- 4. Photic Stimulator\* Section Section where you can adjust Photic/MicroTesla feedback.
- 5. Auditory Stimulator Section Section where you can adjust auditory feedback.
- 6. Vibrotactile Stimulator\*\* Section Section where you can adjust vibrotactile feedback.

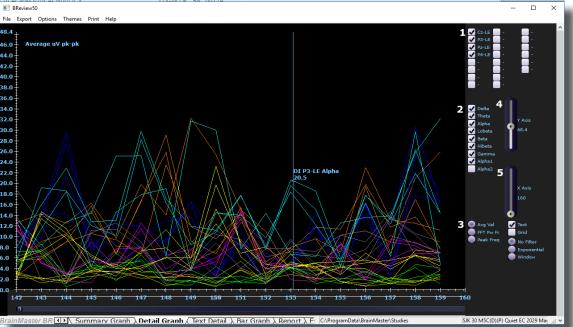

\*PC Controlled Photic requires StimFlash. StimFlash is an optional purchase.

\*\*PC Controlled Vibrotactile Stimulation requires InterActor software. InterActor software is an optional purchase.

#### **Review Session Results - Summary Graph**

- 1. Channels Section Section where you can select the channels for reviewing.
- 2. Bands Section Section where you can select the bands for reviewing.
- 3. **Metrics Section** Section where you can select different metrics for viewing, as well as additional viewing options on the graph itself.
- 4. **Y-Axis Control** Control that allows you to adjust how much data is viewed on the Y-Axis of the graph.
- 5. **X-Axis Control** Control that allows you to adjust how much data is viewed on the X-Axis of the graph.

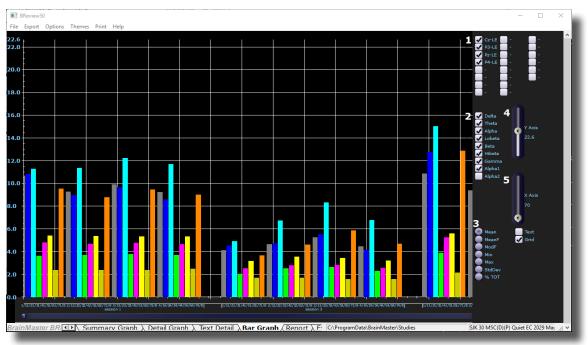

#### **Review Session Results - Detail Graph**

- 1. Channels Section Section where you can select the channels for reviewing.
- 2. Bands Section Section where you can select the bands for reviewing.
- 3. **Metrics Section** Section where you can select different metrics for viewing, as well as additional viewing options on the graph itself.
- 4. **Y-Axis Control** Control that allows you to adjust how much data is viewed on the Y-Axis of the graph.
- 5. **X-Axis Control** Control that allows you to adjust how much data is viewed on the X-Axis of the graph.

1. **Data Section** – Section that lists out the Average Amplitude separated by sessions, runs, and channels

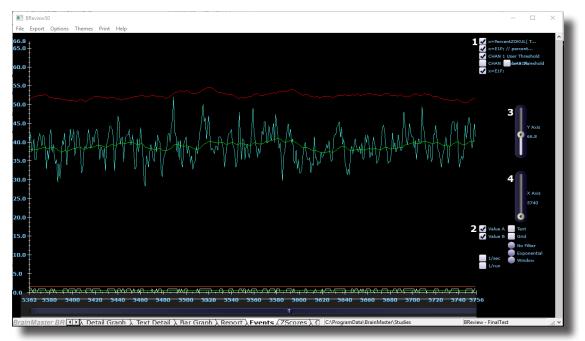

#### **Review Session Results - Bar Graph**

- 1. Channels Section Section where you can select the channels for reviewing.
- 2. Bands Section Section where you can select the bands for reviewing.
- 3. **Metrics Section** Section where you can select different metrics for viewing, as well as addtional viewing options on the graph itself.
- 4. **Y-Axis Control** Control that allows you to adjust how much data is viewed on the Y-Axis of the graph.
- 5. **X-Axis Control** Control that allows you to adjust how much data is viewed on the X-Axis of the graph.

#### **Review Session Results - Report**

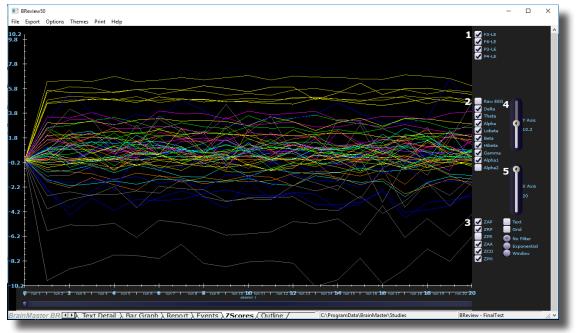

1. **Overview Section** – Section that gives an overview of the patient folder including date used, band information, basic training information, and average microvoltage of the bands

#### **Review Session Results - Event Graph**

- 1. **Events Section** Section where you can select the Events for reviewing.
- 2. **Metrics Section** Section where you can select different metrics for viewing, as well as additional viewing options on the graph itself.
- 3. **Y-Axis Control** Control that allows you to adjust how much data is viewed on the Y-Axis of the graph.
- 4. **X-Axis Control** Control that allows you to adjust how much data is viewed on the X-Axis of the graph.

### **Review Session Results - Z-Score Graph**

- 1. **Channels Section** Section where you can select the channels for reviewing.
- 2. Bands Section Section where you can select the bands for reviewing.
- 3. **Metrics Section** Section where you can select different metrics for viewing, as well as additional viewing options on the graph itself.
- 4. **Y-Axis Control** Control that allows you to adjust how much data is viewed on the Y-Axis of the graph.
- 5. X-Axis Control Control that allows you to adjust how much data is viewed on the X-Axis of

the graph.

2. The following screen will appear, asking what you would like to do. There are 4 options:

Do to want to: X
Create a new study with these settings
Use these settings in the current study
Use these settings and pick a study
Run a temporary session
ОК

- **a.** Create a new study with these settings This will bring you to the Create Folder Tab, so that you can create a new folder.
- b. Use these settings in the current study This will automatically load these settings into the Study Folder that you last ran a session with, and will open the software to this Study Folder
- **c.** Use these settings and pick a study This option will allow you to pick a Study folder that you would like to load this into. After you have picked, it will open the software to this Study Folder.
- **d. Run a temporary session** This will load the settings into a Study Folder named Temporary Session, and will open the software to this Study Folder.

To create a new folder, click Create a new study with these settings.

3. Type in the name that you would like, and the file ID for the folder in the proper fields. When naming the folder, please take HIPAA compliance into consideration. When you have entered the name and file ID, click OK to continue.

The settings file will now be loaded into the Study Folder that you have selected.

**\*\*\*PLEASE NOTE:** You cannot change settings to a settings file outside of the BrainAvatar Software.

Walkthrough Guide: How to convert a Settings File from either the BrainMaster 3.0 Series Software or Discovery Series Software into the BrainAvatar 4.0 Series Software

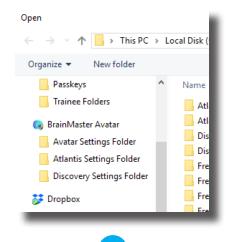

1. From the Training Screen, Click the File Tab, then Import Settings.

- 2. You will have to do two things from here:
  - A. First, you will have to switch the type of files that you are looking for from "Setup Files", to "Old settings file (e.g. settings)".

B. Next, you will have to direct yourself to the original BrainMaster Settings Directory that you would like to move the settings from. This can be done by using the scroll bar on the left to move to the top of the extras bar, and choose the BrainMaster Settings Directory that best suits your needs.

C. After directing yourself to the directory that you would like to choose for your settings file, from the directory on your right, find the protocol folder that best suits your needs, and choose this by double-clicking on it. Then, double-click on the "settings" file that appears next.

You have now converted a BrainMaster 2.5, 3.0, or Discovery Settings file to be used as a Setting File for the BrainAvatar Software. You will be able to tell this, as this will now be listed in your BrainAvatar Settings files.

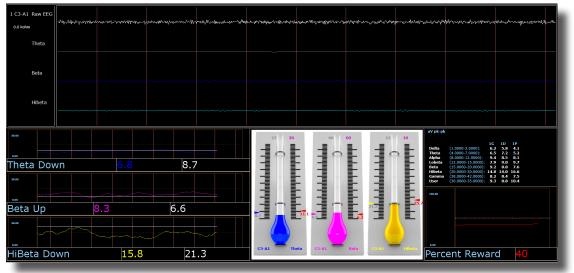

**\*\*\*PLEASE NOTE:** This protocol will have very little displays on the screen. To learn more about customizing displays, please see in the Panel Wizard Section.

### **Basic Settings Protocols Crib Notes**

### Alert - Beta Up Theta and Hibeta Down

#### **Basic Overview**

Alert is known more generally as beta training. It consists of a reward on increasing beta, with inhibits placed on theta and hibeta. This protocol is generally applied at C3. When all criteria are met for 500 milli-seconds the trainee will get a reward tone (.wav)

#### **Default Settings**

Threshold Updating is set to autoupdate repeat: after pre-baseline and after each run. This protocol is set to update 10 times, every 120 seconds (20 minute session).

#### **Percent Time over Threshold Hot Keys**

't' increase Theta - 'Shift T' to decrease Theta

'b' increase Beta - 'Shift B' to decrease Beta

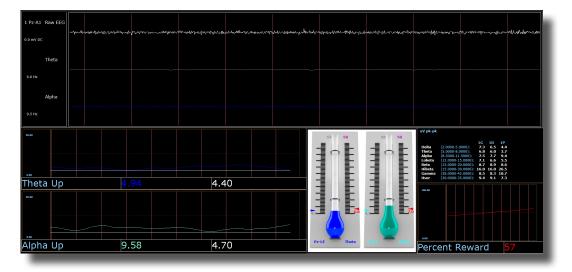

'h' increase Hibeta - 'Shift H' to decrease Hibeta

#### Note: 'y' key can be used to manually update at any time

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**\*\*\*PLEASE NOTE:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

### Deep – Theta Alpha Up

#### **Basic Overview**

Deep is known as alpha/theta trainng. It consists of a reward on increasing alpha and theta. This protocol is generally applied at Pz. When each band criteria is met for 500 milliseconds the trainee will get a reward tone for each band.

#### **Default Settings**

Threshold Updating is set to autoupdate repeat: after pre-baseline and after each run. This protocol is set to update 10 times every 180 seconds (30 minute session).

#### **Percent Time over Threshold Hot Keys**

't' increase Theta - 'Shift T' to decrease Theta

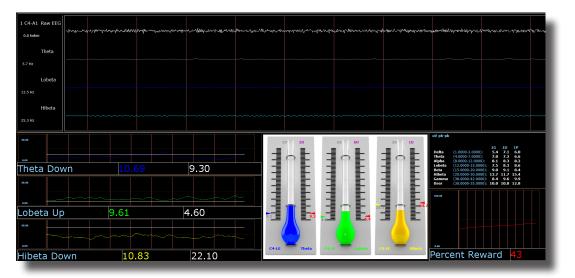

'a' increase Alpha - 'Shift A' to decrease Alpha

#### Note: 'y' key can be used to manually update at any time

This protocol is set up to work with EEG Audio, BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**\*\*\*PLEASE NOTE:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

### Focus – Lobeta Up Theta and Hibeta Down

#### **Basic Overview**

Focus is known more generally as beta training. It consists of a reward on increasing lobeta, with inhibits placed on theta and hibeta. This protocol is generally applied at C4. When all criteria are met for 500 milli-seconds the trainee will get a reward tone (.wav)

#### **Default Settings**

Threshold Updating is set to autoupdate repeat: after pre-baseline and after each run. This protocol is set to update 10 times every 120 seconds (20 minute session).

#### **Percent Time over Threshold Hot Keys**

't' increase Theta - 'Shift T' to decrease Theta

'l' increase Lobeta - 'Shift L' to decrease Lobeta

'h' increase Hibeta - 'Shift H' to decrease Hibeta

#### Note: 'y' key can be used to manually update at any time

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**PLEASE NOTE:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

#### **Basic Overview**

The No Limit QEEG Assessment file is acquiring the standard sensor positions defined by the 10-20 system. The recording condition can be changed on the fly from the condition drop down menu at the top of the BrainAvatar window. Each time the condition is changed from the drop down menu a new EDF is created.

The observed offset values on the acquisition screen in BrainAvatar software is generally useful for assessing sensor connection quality

#### **Recommended DC Offsets Values**

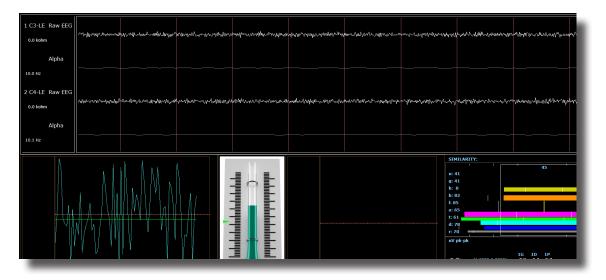

Gold - 50 Millivolts Tin - 30 Millivolts Silver/ Silver Chloride - 10 Millivolts

#### **Recommended Impedance Values (Optional add-on)**

0-5 kohm – White 5-10 kohms – Green 10-15 kohm – Yellow 15> kohm – Red

**PLEASE NOTE:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

### Peak – Alpha Coherence Up

#### **Basic Overview**

Peak is a more specific type of alpha training. Peak's goal is achieving a coherent state between the left and right hemispheres in the alpha band (8-12 Hz). Eyes are generally closed when using the 'peak' protocol. This protocol is generally applied at C3 and C4. When the alpha coherence is above the training threshold the trainee will get an event sound (MIDI Tone).

#### **Default Settings**

Protocol is **not** set to autothreshold, and session is set to run for 20 minutes.

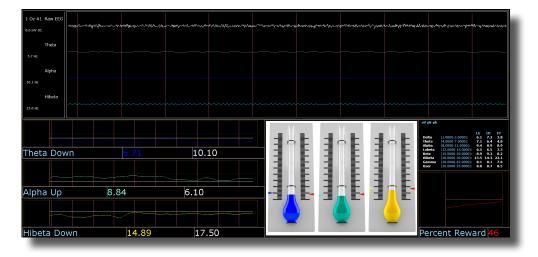

#### **Threshold Hot Keys**

'c' increase Coherence Threshold - 'Shift C' to decrease Coherence Threshold

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

### Relax – Alpha Up Theta Hibeta Down

#### **Basic Overview**

Relax is a classic alpha protocol. It consists of a reward on increasing alpha, with inhibits placed on the ta and hibeta. This protocol is generally applied at Oz. When all criteria are met for 500 millisecond's the trainee will get a reward tone (.wav)

#### **Default Settings**

Threshold Updating is set to autoupdate repeat: after pre-baseline and after each run. This protocol is set to update 10 times every 120 seconds (20 minute session).

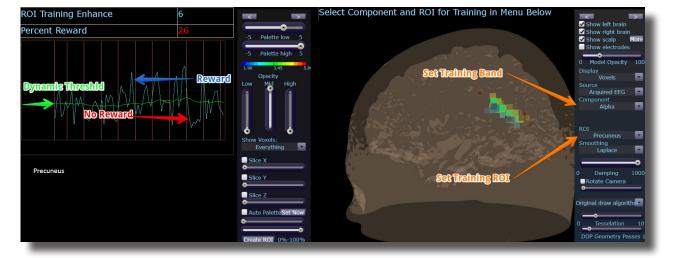

#### **Percent Time over Threshold Hot Keys**

- 'a' increase Alpha 'Shift A' to decrease Alpha
- 't' increase Theta 'Shift T' to decrease Theta
- 'h' increase Hibeta 'Shift H' to decrease Hibeta

Note: 'y' key can be used to manually update at any time

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

### **ROIA Enhance – Region of Interest Up Train**

#### **Basic Overview**

ROIA Enhance is a protocol that requires the standard 10/20 sites acquired. This settings file is set to up train the band and region of interest defined in the component and ROI drop down menu in the 3D head display. When criteria is met for the trainee will get an event sound (MIDI Tone).

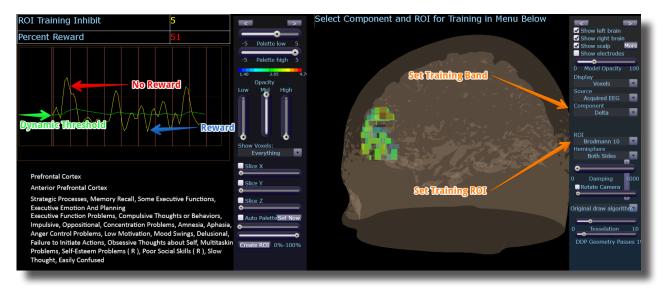

#### **Default Settings**

Threshold is set to dynamically adjust which will reward trainee about 50-60% throughout the training session. This settings file is set to run for 20 minutes

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** The following on the fly adjustments DO NOT apply to all settings file designs training region of interest amplitude. The settings file explained above is designed to make on the fly adjustments from the drop down menu. The following equation in the Event Wizard is required in order to make these adjustments on the fly: x=LoretaROIA(SELECTROI,SELECTBAND);

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

### **ROIA Inhibit Training Dynamic**

#### **Basic Overview**

ROIA Inhibit is a settings file that requires the standard 10/20 sites acquired. This settings file is set to up train the band and region of interest defined in the component and ROI drop down menu in the 3D head display. When criteria is met for the trainee will get an event sound (MIDI Tone).

#### **Default Settings**

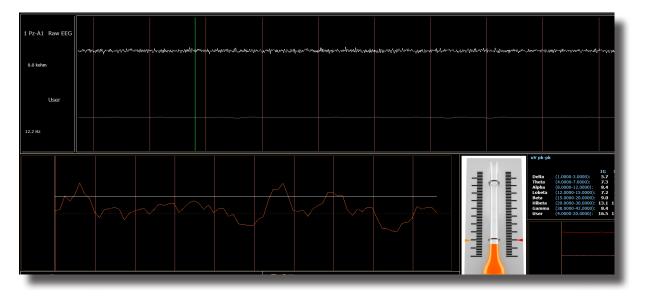

Threshold is set to dynamically adjust which will reward trainee about 50-60% throughout the training session. This settings file is set to run for 20 minutes

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** The following on the fly adjustments DO NOT apply to all settings file designs training region of interest amplitude. The settings file explained above is designed to make on the fly adjustments from the drop down menu. The following equation in the Event Wizard is required in order to make these adjustments on the fly: x=LoretaROIA(SELECTROI,SELECTBAND);

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

## Squash - Wideband Inhibit

#### **Basic Overview**

Squash is a protocol that consists of inhibits placed on four bands, spanning the range from 4-20 Hz. This protocol is generally applied at Cz. When criteria is met the trainee will get an event sound (MIDI Tone).

#### **Default Settings**

Threshold Updating is set to autoupdate repeat: after pre-baseline and after each run. This protocol is set to update 10 times, every 120 seconds (20 minute session).

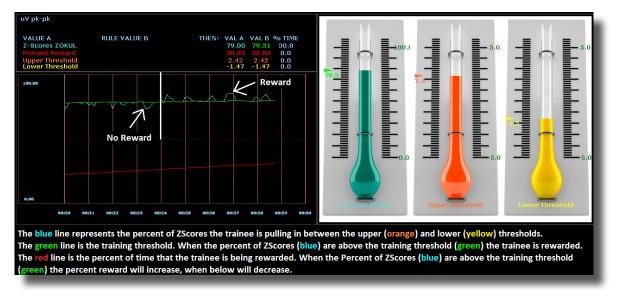

#### **Percent Time over Threshold Hot Keys**

'u' increase User – 'Shift U' to decrease User

Note: 'y' key can be used to manually update at any time

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

## Z-Score PZOKUL Dynamic and Z-Score PZOKUL 'C' Key

#### **Basic Overview**

Z-Score training is a scientifically designed software approach which will analyze selected training; compare those sites with a normative database, and reward the Z-Scores that fit within the desired upper and lower limits (database e.g. ANI, BrainDx, qEEG Pro). Z-Score PZOKUL Dynamic protocol has a training threshold that will auto adjust based on the percent of Z-Scores the trainee is pulling in between the upper and lower limits. Z-Scores PZOKUL 'C' Key - is used when one wants to manually adjust the training threshold. When the trainee's percent of Z-Scores are above the training threshold the trainee will get a reward tone.

#### **Threshold Hot Keys**

'u' increase Upper Threshold - 'Shift U' to decrease Upper Threshold

'l' increase Lower Threshold – 'Shift L' to decrease Lower Threshold

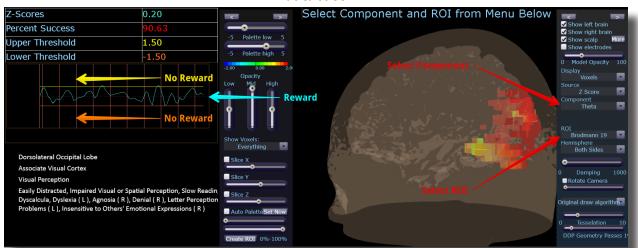

#### Z-Scores PZOKUL 'C' Key - Threshold Hot Keys

'c' increase Controlled Threshold – 'Shift C' to decrease Controlled Threshold

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

# Z-Score sLORETA Absolute Power – Training a single Region of Interest and a single band to a normative database

#### **Basic Overview**

Z-Score sLORETA Absolute Power training is a scientifically designed software approach which will analyze selected training compare those regions of interest with a normative database, and reward the Z-Scores that fit within the desired upper and lower limits (database e.g. BrainDx, qEEG Pro). This is a settings file that requires the standard 10/20 sites. Z-Score sLORETA Absolute Power settings file will reward the trainee when the selected training perimeter is in-between the upper and lower threshold. The region of interest and component are adjusted from the Live LORETA Projector drop down menu.

#### **Default Settings**

Threshold is manually adjusted throughout the training session. This settings file is set to run for 20 minutes

#### **Threshold Hot Keys**

'u' increase Upper Threshold - 'Shift U' to decrease Upper Threshold

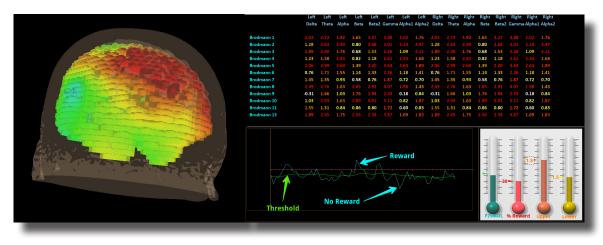

'l' increase Lower Threshold – 'Shift L' to decrease Lower Threshold

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** The following on the fly adjustments DO NOT apply to all settings file designs training region of interest sLORETA Absolute Power. The settings file explained above is designed to make on the fly adjustments from the drop down menu. The following equation in the Event Wizard is required in order to make these adjustments on the fly: x=LoretaROIZAP(SELECTROI,SELECTBAND);

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

## Z-Score sLORETA PZOKUL Dynamic and Z-Score sLORETA PZOKUL 'C' Key – Training multiple regions of interest and multiple bands to a normative database

#### **Basic Overview**

sLORETA Z-Score training is a scientifically designed software approach which will analyze selected training compare those regions of interest with a normative database, and reward the Z-Scores that fit within the desired upper and lower limits (database e.g. BrainDx, qEEG Pro). This is a settings file that requires the standard 10/20 sites. Z-Score PZOKUL Dynamic protocol has a training threshold that will auto adjust based on the percent of Z-Scores the trainee is pulling in between the upper and lower limits. Z-Scores PZOKUL 'C' Key - is used when one wants to manually adjust the training threshold. When the trainee's percent of Z-Scores are above the training threshold the trainee will get a reward tone. Training location are setup within the BrainAvatar Z-Score Setup. Left click on the regions to train, then right click over the regions to customize training bands.

#### **Threshold Hot Keys**

'u' increase Upper Threshold - 'Shift U' to decrease Upper Threshold

'l' increase Lower Threshold – 'Shift L' to decrease Lower Threshold

Z-Scores PZOKUL 'C' Key - Threshold Hot Keys

'c' increase Controlled Threshold - 'Shift C' to decrease Controlled Threshold

This protocol is set up to work with the BrainMaster DVD player, Flash Player, Dimmer, Multi Media Player, and third party games (e.g. InnerTube, Particle Editor, Zukor)

**Please Note:** All designs provided by BrainMaster, are for demonstration and illustration purposes only. It is the clinician's responsibility to ensure that any designs used provide the intended feedback.

## **Keyboard Quick Keys**

The following keyboard controls can be used at any time when the BrainMaster is operating.

Please Note: When autothreshold is used, threshold commands change percent target value.

**Please Note:** Pressing <Tab> switches into "frequency adjust" mode. Pressing "a" for alpha, "t" for theta, etc, will make the frequency band change per what you have selected for the "on-the-fly" Frequency adjustment.

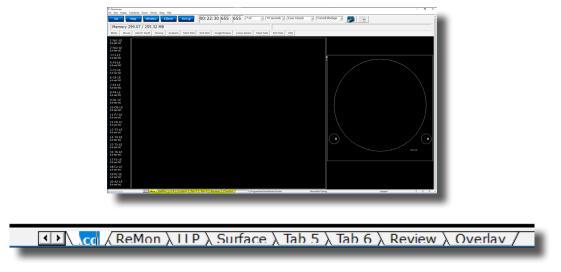

Кеу	Function
а	Increase the alpha or 3rd bands threshold by 0.1uV or target by 1 percent
А	Decrease the alpha or 3rd bands threshold by 0.1uV or target by 1 percent
b	Increase the beta or 5th bands threshold by 0.1uV or target by 1 percent
В	Decrease the beta or 5th bands threshold by 0.1uV or target by 1 percent
С	Increase coherence/phase threshold
С	Decrease coherence/phase threshold
d	Increase the delta or 1st bands threshold by 0.1uV or target by 1 percent
D	Decrease the delta or 1st bands threshold by 0.1uV or target by 1 percent
g	Increase the gamma or 7th bands threshold 0.1 uV or target by 1 percent
G	Decrease the gamma or 7th bands threshold 0.1 uV or target by 1 percent
h	Increase the hibeta or 6th bands threshold 0.1 uV or target by 1 percent
Н	Decrease the hibeta or 6th bands threshold 0.1 uV or target by 1 percent
1	Increase the lobeta or 4th bands threshold 0.1 uV or target by 1 percent
L	Decrease the lobeta or 4th bands threshold 0.1 uV or target by 1 percent
М	Toggle "Brain Mirror" between FFT and Filtered Mode
r	Reduce artifact rejection threshold value by 10 microvolts
R	Increase artifact rejection threshold value by 10 microvolts
t	Increase the theta or 2nd bands threshold by 0.1 uV or target by 1 percent
Т	Decrease the theta or 2nd bands threshold by 0.1 uV or target by 1 percent
u	Increase the user or 8th bands threshold by 0.1 uV or target by 1 percent
U	Decrease the user or 8th band threshold by 0.1 uV or target by 1 percent
у	Copy autothresholds into current thresholds ("Autoupdate")
<shift> + "="</shift>	Increase the display gain by 20%
-	Decrease the display gain by 20%
<space></space>	Pause or End Pause
1	Set mode so threshold keys (d, t, etc.) adjust channel 1 thresholds only
2	Set mode so threshold keys (d, t, etc.) adjust channel 2 thresholds only

# Keyboard Quick Keys (Continued)

Кеу	Function
3	Set mode so threshold keys (d, t, etc.) adjust channel 3 thresholds only
4	Set mode so threshold keys (d, t, etc.) adjust channel 4 thresholds only
0	Set mode so threshold keys (d, t, etc.) adjust all thresholds
<up> <pg up=""></pg></up>	Moves the display up (CSA Display only)
<down> <pg dn=""></pg></down>	Moves the display down (CSA Display only)
<left></left>	Moves the display left (CSA Display only)
<right></right>	Moves the display right (CSA Display only)
<insert></insert>	Switches between controlling look point and camera (CSA Display Only)
<shift> + 9</shift>	Decreases the Photic Output Amplitude by 1%
<shift> + 0</shift>	Increases the Photic Output Amplitude by 1%
<shift> + "."</shift>	Enables Impedance (Discovery only)
<shift> + ","</shift>	Disables Impedance (Discovery only)
<ctrl> + e</ctrl>	Opens the BrainAvatar Setup Menu on the Event Wizard Tab
<ctrl> + z</ctrl>	Opens the BrainAvatar Setup Menu on the Z-Score Tab

## **Renaming Tabs**

1. From the Training Screen, find the Tab Section located at the bottom of the screen. Find the tab that you would like to edit, and double-click. Doing this will allow you to edit the Tab name to what you would like.

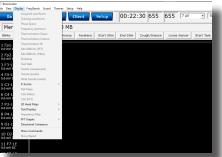

All of the Tabs can be renamed. If the names of the tabs get too long, you can use the arrow buttons located next to the Tab Section to search through them.

## **Displays(Tabs)**

- 1. There are three ways to choose what to display on each tabs:
  - A. **Classic Method:** From the Setup Screen, click the Settings Tab, and then click the Display Tab, and choose by putting a check mark by the items that you would like displayed for each Tab. There are 6 Tabs for the Training Screen and Client Screen, plus an Overlay Screen, that can be displayed on all Tabs. Once you have chosen the Displays that you would like, please click the Use Settings and Close Button. **PLEASE NOTE:** This will not properly reflect, if you have done any changes using the Panel Wizard.

## **Trend Graph (Components)**

**Use:** Displays a graph for each component for each trained site.

**Requirements:** Displays only sites selected in the Montage Section of Settings. **Left-Click Mouse Function:** No.

Right-Click Mouse Function (Panel Option): No.

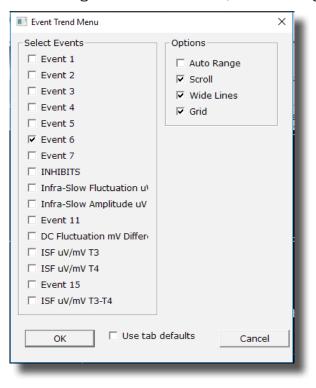

#### Trend Graph (Events)

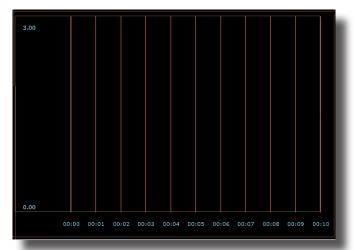

**Use:** Displays a graph for each event utilized through the Event Wizard.

**Requirements:** Displays only if an Event is Enabled and Visible.

Left-Click Mouse Function: No.

**Right-Click Mouse Function (Panel Option):** Yes. Allows you to choose which Events that you would like to display, as well as different settings for size of the lines, and the range of the graph.

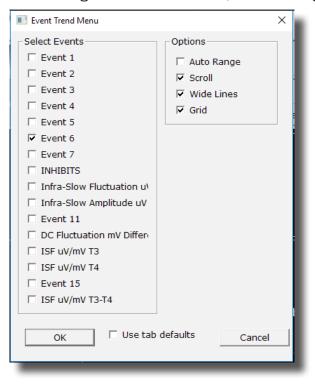

#### Wide Trend (Events) (Same as Trends)

**Use:** Displays a graph for each event utilized through the Event Wizard.

**Requirements:** Displays only if an Event is Enabled and Visible.

Left-Click Mouse Function: No.

**Right-Click Mouse Function (Panel Option):** Yes. Allows you to choose which Events that you would like to display, as well as different settings for size of the lines, and the range of the graph.

**Z-Scores** 

**Use:** Displays the Absolute Power, Relative Power, and Power Ratios for all components chosen at each trained site.

**Requirements:** Displays only for sites, components, and values chosen in the Z-Score Section of Settings.

Left-Click Mouse Function: No.

**Right-Click Mouse Function (Panel Option):** Yes. Allows you to select the bands for viewing, the speed that you would like for the data, what data you would like to view, adjust the palette for the data coming in, as well as choose to display only the Z-Scores being LZT Trained.

### **Advanced Displays**

#### Volume Head Map (Optional Purchase)

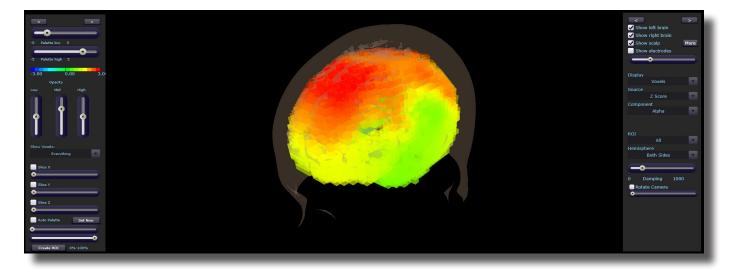

- 1. Model Display Section Section where you can choose various items to be displayed for the model.
- 2. **Display Drop-Down Menu –** Drop-Down Menu, where you can choose the type of display for the data. You can choose between Voxels or Dipoles.
- Source Drop-Down Menu Drop-Down Menu, where you can choose the source of the display information. You can choose between various acquired and Z-Scores sources, based on your Display choice.
- 4. **Component Drop-Down Menu –** Drop-Down Menu, where you can choose the component to be displayed. You can either choose the Raw EEG, or any of the filtered bands.
- 5. **ROI Drop-Down Menu –** Drop-Down Menu, where you can choose the Region of Interest to be displayed. For a detailed list of the ROI's, please see the next page.
- 6. **Hemisphere Drop-Down Menu –** Drop-Down Menu, where you can choose to look at the Left Hemisphere, Right Hemisphere, or both.
- 7. **Damping Slider –** Slide bar that sets the rate of change for the display.
- 8. Rotation Section Section that you can set the rotation and speed of rotation for the Head Map.

#### Volume Head Map (Optional Purchase) (Continued)

- 9. Palette Low Slider Slide bar that sets the low range of the palette for displaying.
- 10. Palette High Slider Slide bar that sets the high range of the palette for displaying.
- 11. **Opacity Section –** Slider bars that sets the opacity for the different ranges of data.
- 12. Show Voxel Drop-Down Drop-Down that will set what will be displayed based off of either the Palette or Percentage Slider
- 13. Slice Section Section, that you can chose an area for viewing base on X, Y or Z coordinates on the head.
- 14. Auto Palette Section Section where you can allow the data to set the range that you are investigating, and click the Set Now to set the range to a permanent range.
- 15. **Percentage Sliders** Section where you can set the Percentage range that you would like to be displayed for the Show Voxel Drop-Down.

10

**Requirements:** Displays only sites selected in the Acquisition Screen, and the LLP Add-on.

**Left-Click Mouse Function:** Yes. By left-clicking and holding down on the mouse, you can change the displays orientation. Using the Scroll control, will zoom the field in and out.

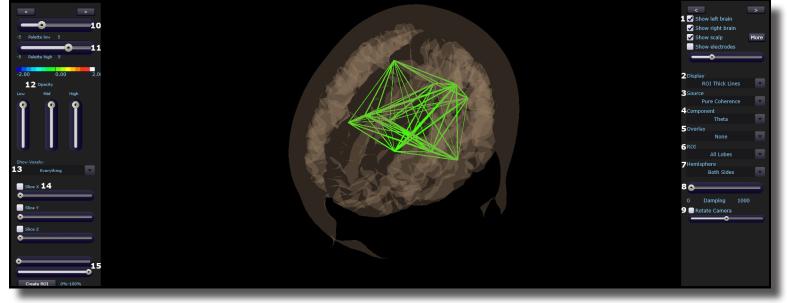

**Right-Click Mouse Function(Panel Option):** Yes. Allows you to either hide or display the Palette or Signal menu.

### **EEG Data Files**

### Simple EEG Data File Playback (Session Type Method)

**\*\*\*PLEASE NOTE:** This process can only be done if you have purchased a BrainMaster Clinical License.

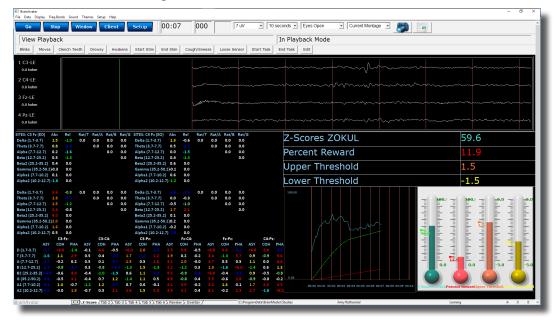

1. From the Setup Screen, click the Settings Tab, then the Session Tab. On the Session Tab, change the Session Type to Playback, and click Use Settings and Close. When ready click GO.

2. Use the Open Screen to Navigate to the EDF file that you would like to play.

	ame			V EDE Fil	es (*.edf)	~

The EDF will now begin to playback. The EDF will operate exactly as live EEG. All displays will react as if live EEG information is coming in.

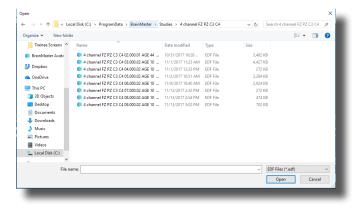

### Simple EEG Data File Playback (Playback File Method)

**\*\*\*PLEASE NOTE:** This process can only be done if you have purchased a BrainMaster Clinical License.

1. From the Training Screen, click the Data Tab, and choose the option Playback File.

2. Use the Open Screen to Navigate to the EDF file that you would like to play.

The EDF will now begin to playback. The EDF will operate exactly as live EEG. All displays will react as if live EEG information is coming in.

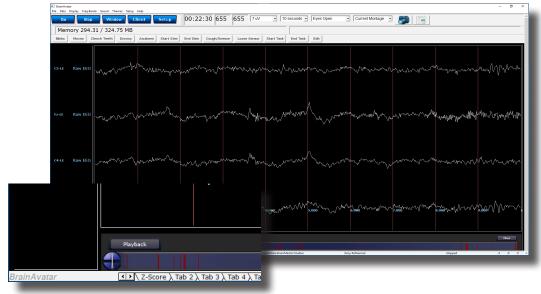

### **Opening an EEG Data File (Windows/File Explorer)**

1. Locate the EDF, BDF, or DAT file that you would like to open. When you find this file double-click the file.

#### Playing back a section of an EDF File

- Highlight the EEG that you would like to use by holding the Left-Mouse button down, and moving the mouse. This will bring up the Panel Options Menu. On the Panel Options, you have multiple options
  - **a.** Data range: This will allow you to choose whether you would like to playback the area selected, or to look at the entire EDF File.
  - **b.** What to process: If the whole file is selected, or you have selected areas that have annotations then you can choose either choose to playback the entire file, Sections marked good, or sections not marked bad.
  - **c. Playback:** Depending on the information chosen above, you can play what you have selected, and choose to either repeat the playback, or simply playback one time.

#### **Deleting an Annotation (Review Menu)**

 Open the Review Menu by either Double-clicking the anywhere in the EEG that you are reviewing or using the left mouse and selecting a selection of EEG. After doing this, the menu will open. Navigate to the Annotate Tab. If you would like to remove all Markers. Click the Delete all Markers Button. Or, if you would like to pick and choose, then click the List Markers Button

2. On the Marker Menu, move your mouse on the Marker you would like to delete and double-click with the Mouse. This will make a menu appear asking if you would like to delete the Marker. Click OK to continue

The EDF File will now have this Annotation/s removed from the EDF. You will be able to know that this is complete by viewing the List Markers Menu, and seeing the markers that were deleted are no longer listed.

### ZBuilder

### **ZBuilder Control Menu**

Dialog     Annotate Playback Export ZBuilder Analyze G	Senerate Protocol
Image: Construction of the selected range: Constructing range: Construction of the selected range: Construc	that selection, analyze: of the data ly the sections marked good except sections marked bad <b>5</b> Output file: © Create file in the current study © Create file in the control folder <b>6</b> Patient © Eyes closed © Eyes closed © Eyes open Age 31 <b>8</b> Run ZBuilder <b>9</b> Cancel

- 1. What To Playback Section Section where you can choose what information that you would like to process for the ZBuilder File
  - a. The Whole File Choose this to process the entire EDF, BDF, or DAT File
  - **b.** The Selected Range Choose this to process only the selection area chosen through the mouse
- 2. What to include in the file: Section Section where you can choose what information will be included in the file
  - a. Similarities This will include all forms of cross-channel communication for the 19 channels
  - b. Voxels This will include the Power information for the 6,239 Voxels
  - c. ROI Coherence This will include all of possible ROI Connectivity Combinations
  - d. ROI Directional Coherence This will included all of the Possible ROI Directional Coherence Metrics
- 3. **Options Section –** Section where you can set different Options for the software to do after ZBuilder has been run
  - a. Start Excel when done Checkbox Check to have Excel to open the completed file after this has been processed.

🔳 Dialog		$\times$
Annotate   Playback   Export ZBuilder	Analyze Generate Protocol	
1 What to analyze:         Image: Contract The whole file         Image: Contract The selected range:         From       803         To       ROI Direction         To       Start Excel when done         To       803         To       803         To       803         To       803         To       803         To       803         To       804         To <td>Within that selection, analyze:     Only the sections marked good     Only the sections marked bad      SOutput file:     Otreate file in the current study     C Create file in the control folder      Onal Coherence     G Patient     C Eyes closed</td> <td></td>	Within that selection, analyze:     Only the sections marked good     Only the sections marked bad      SOutput file:     Otreate file in the current study     C Create file in the control folder      Onal Coherence     G Patient     C Eyes closed	

- 4. Within that selection, analyze: Section Section where you can set a more specific requirement of what you will playback
  - a. All of the Data Will pprocess all of the Data defined by the What To Analyze Section
  - b. Only the sections marked good Will process all of the sections that have been annotated good that are within the What To Analyze Section. This will be grayed out, if there are no sections marked good within the Analyze section
  - **c.** All except sections marked bad Will process all of the sections that have not been annotated as bad that are within the What To Analyze Section. This will be grayed out, if there are no

sections marked bad within the Analyze section

- 5. **Output file: Section** Section where you can set the Output file name/Destination.
  - **a.** Create file in the current study Creates a file named ZBuilderEO or ZBuilder EC in the current Study Folder that you opened the EDF, BDF, or DAT file for Review in.
  - **b.** Default file name in the control folder Creates a file named ZBuilderEO or ZBuilderEC in the directory c:\ProgramData\BrainMaster\Control.

#### **Scalars Section**

- 1. **Channel Section** This section will display the labeling for all of the Channels that have been collected from using the ZBuilder system.
- 2. **Value Section** This section will display the label for the information that has been collected in the Frequency Band Section
  - a. FLOW Also known as Frequency Low. This is the lowest range of the frequency band
  - **b. FHIGH** Also known as Frequency High. This is the highest range of the frequency band.
  - **c. MEAN.X** This is the average of Amplitude for the particular band, where "X" is that particular Channel number.
  - **d. STD.X** This is the Standard deviation of the Amplitude for the particular band, where "X" is that particular Channel number.
  - **e. MEAN\_L.X** This is the Log of the average of amplitude for the particular band, where "X" is that particular Channel number.
  - **f. STD\_L.X** This is the Log of the Standard Deviation of the amplitude for the particular band, where "X" is that particular Channel number.
  - **g. MIN.X** This is the minimum value seen for the particular band, where "X" is that particular Channel number.

Channel ${f 1}$	Value 2	Raw EEG 3	Delta
	FLOW	0	1
	FHIGH	0	3
Fp1	MEAN.01	11.40293	2.21464
	STD.01	7.42870	1.22645
	MEANL.01	0.90842	0.20768
	STDL.01	0.44967	0.60558
	OMEAN.01	132.50620	23.64983
	MIN.01	-45.65348	-45.65348
	MAX.01	37.35285	37.35285
	MEANF.01	0.00000	6.03470
	STDF.01	0.00000	0.64583
	MEANMF.01	0.00000	1.77104
	STDMF.01	0.00000	0.10426

- **h. MAX.X** This is the maximum value seen for the particular band, where "X" is that particular **Channel number.**
- **i. MEANF.X** This is the percent of power for the particular band over the entire frequency range, where "X" is that particular Channel number.
- **j. STDF.X** This is the Standard Deviation of the percent of energy for that particular band, where "X" is that particular Channel number.
- 3. **Frequency Section** This section will show all bands (as defined by the Which Filters to use Section), and their collected information.

#### **Similarities Section**

Phase Similarity ${f 1}$	Fp1	F3	C3	P3	01	F7
Fp1 <b>2</b>		<b>4</b> 0.59970	0.39581	0.27584	0.27137	0.64357
F3	3 0.27043		0.67634	0.43348	0.24508	0.67370
C3	0.28471	0.22791		0.73297	0.41027	0.45238
P3	0.27387	0.25451	0.20043		0.61431	0.28055
01	0.28111	0.25873	0.29121	0.24105		0.19090
F7	0.27351	0.19526	0.26441	0.26124	0.24051	
Т3	0.30854	0.27933	0.22592	0.27641	0.30017	0.29294
Т5	0.28137	0.27958	0.28825	0.25914	0.23644	0.29733
Fz	0.25218	0.13460	0.27368	0.25481	0.25860	0.23910

**PLEASE NOTE:** There will be a Tab for each Waveform. In order to see this information, you will have to see them individually.

- 1. **Similarity Type** Displays the type of Similarty being viewed. There are seven (7) different types looked at.
  - a. Phase Similarity
  - b. Training Coherence
  - c. Correlation
  - d. Phase Classic
  - e. Pure Coherence
  - f. Comodulation
  - g. Asymmetry
- 2. Site Locations Shows the different locations that were used in the ZBuilder.
- 3. **Mean Information** The Bottom-Half of the readings gives you the Log of the Average amplitude for the particular site combination.
- 4. **Standard Deviation Information** The Top-Half of the readings gives you the Log of the standard deviation of amplitude for the particular site combination.

#### **Band Ratios Section**

Channel $1$	Value 2	Delta/Theta	Delta/Alpha	Delta/Lobeta	Delta/Beta
Fp1	MEANL.01	0.13367	0.15673	0.28947	0.10808
	STDL.01	0.43137	0.46197	0.39712	0.49618
F3	MEANL.02	-0.05553	-0.09732	0.20998	-0.09504
	STDL.02	0.39622	0.38859	0.46349	0.42809
C3	MEANL.03	0.01737	-0.04601	0.15296	-0.12898
	STDL.03	0.39718	0.40537	0.39239	0.45731
P3	MEANL.04	0.02333	0.02129	0.10588	-0.10615
	STDL.04	0.38589	0.35589	0.40083	0.43698

1. **Channel Section** – This section will display the labeling for all of the Channels that have been collected from using the ZBuilder system.

- 2. **Value Section** This section will display the label for the information that has been collected in the Frequency Band Section
  - **a. MEANL.X** This is the Log of the average of Amplitude for the band ratio, where "X" is that particular Channel number.
  - **b. STDL.X** This is the Log of the Standard deviation of the Amplitude for the band ratio, where "X" is that particular Channel number.

**Ratio Section** – This section will show all band ratios (as defined by the Which Filters to use Section), and their collected information

#### **Voxels Section**

Voxel Number 1	Raw EEG.AVG	Raw EEG.STD	Raw EEG.AVGL	Raw EEG.STDL	Delta.AVG	Delta.STD	Delta.AVGL	Delta.STDL
1	∠ <u>4.373</u>	0	1.186	0.446	0.814	0	-0.319	0.703
2	4.516	0	1.214	0.447	0.846	0	-0.286	0.705
3	4.609	0	1.232	0.447	0.873	0	-0.259	0.706
4	4.156	0	1.14	0.451	0.801	0	-0.331	0.701
5	4.277	0	1.165	0.45	0.826	0	-0.306	0.702
6	4.387	0	1.188	0.449	0.853	0	-0.279	0.703
7	3.965	0	1.096	0.46	0.796	0	-0.336	0.7
8	4.077	0	1.121	0.457	0.817	0	-0.314	0.701
9	4.234	0	1.155	0.455	0.859	0	-0.269	0.701
10	3.904	0	1.08	0.465	0.815	0	-0.315	0.698

- 1. Voxel Number This section contains the labeling for all of the Voxels
- 2. **Frequency Section** This section will show all bands (as defined by the Which Filters to use Section), and their collected information.
  - **a. BAND.AVG** This is the average of amplitude for the particular band, where "BAND" is the band as defined by the Description section.
  - **b. BAND.STD** This the standard deviation of the amplitude for the particular band, where "BAND" is the band as defined by the Description section.
  - **c. BAND.AVGL** This is the Log of the average of the amplitude for the particular band, where "BAND" is the band as defined by the Description Section.
  - **d. BAND.STDL** This the Log of the standard deviation of the amplitude for the particular band, where "BAND" is the band as defined by the Description section.

#### **ROI Coherence Section**

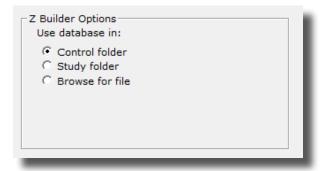

ROI Name	ROI No	LRB	Frontal Lobe			Limbic Lobe			
			1001			1002			
			Left	Right	Both	Left	Right	Both	
Frontal Lobe 1	1001	Left		<b>3</b> -0.06963	-0.06430	-0.07876	-0.08704	-0.08263	
Frontal Lobe	1001	Right	2 0.05187		-0.05756	-0.06814	-0.06040	-0.06340	
Frontal Lobe	1001	Both	0.05067	0.04934		-0.07127	-0.07058	-0.06979	
Limbic Lobe	1002	Left	0.05578	0.05268	0.05285		-0.06511	-0.05713	
Limbic Lobe	1002	Right	0.05815	0.05288	0.05362	0.05614		-0.05410	
Limbic Lobe	1002	Both	0.05658	0.05240	0.05282	0.05363	0.05408		

**PLEASE NOTE:** There will be a Tab for each Waveform. In order to see this information, you will have to see them individually.

- 1. Defined ROI Section Displays the ROI as well as what section of the ROI:
  - a. Left ROI
  - b. Right ROI
  - c. Both
- 2. **Mean Information** The Bottom-Half of the readings gives you the Log of the Average amplitude for the particular site combination.
- 3. **Standard Deviation Information** The Top-Half of the readings gives you the Log of the standard deviation of amplitude for the particular site combination.

#### **Training to a ZBuilder File**

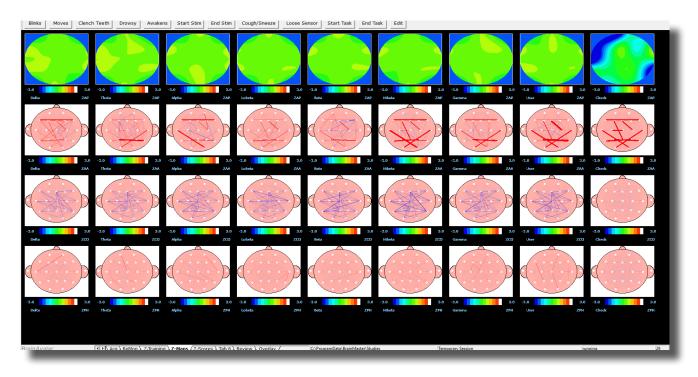

- First, you will need to make sure that you have your ZBuilder enabled. You will need to do this in the Setup Menu, by first clicking on the Settings Tab, then clicking on the Z-Scores Tab. Here, you will need to make sure that you are utilizing ZBuilder for the ZScore Type, as well as the Z-Score Options, channels, bands, and values that you would like to train. Based off of the location of the ZBuilder File, in the ZBuilder Options, you will choose:
  - A. Control Folder Click if you have your ZBuilder File saved in the Control Directory
  - B. Study Folder Click if you have your ZBuilder File saved in the Study Folder that is being utilized
  - C. Browse for file Click if you would like to use Windows Explorer to locate the ZBuilder File on your PC

Depending on the settings, you might see a message stating that the Bands will need to be adjusted to match the Z-Scores that were recorded. The system will adjust itself automatically to the update the filter settings by clicking OK. Or, you click Cancel to change yourself or cancel using Z-Scores Also, you might have to utilize Windows Explorer in order to find the Database File as well, based off of your ZBuilder Options choice.

	9Run Analysis 10Cancel

- 1. What to analyze Section Section where you can choose what information that you would like to analyze.
  - a. The Whole File Choose this to process the entire EDF, BDF, or DAT File
  - b. The Selected Range Choose this to process only the selection area chosen through the mouse
- 2. Within that selection, analyze: Section Section where you can set a more specific requirement of what you will analyze
  - a. All of the Data Will process all of the Data defined by the What to analyze Section
  - **b. Only the sections marked good –** Will process all of the sections that have been annotated good that are within the What to analyze Section. This will be grayed out, if there are no sections marked good within the analyze section
  - **c.** All except sections marked bad Will process all of the sections that have not been annotated as bad that are within the What to analyze Section. This will be grayed out, if there are no sections marked bad within the analyze section
- 3. **Patient Section –** This section will detect the Age and recording condition of the EEG file, and fill this out automatically. Though, if you would like to adjust this, this is where that can be done
- 4. Compute Z-Scores Section Section where you set what Z-Score DLL (if any) you will use. **\*\*\*PLEASE** NOTE: This is necessary for Z-Score Metrics to be possible.

- 1. **ZBuilder Revision** Informs you of which version of the BrainAvatar Software was used to create the ZBuilder File.
- 2. Date Created Lists the Date Created of the ZBuilder File
- 3. From File Informs you of What EEG File was used to create the ZBuilder File
- 4. Sample1 Informs you the Starting Sample Number of the last scanned section of the EDF
- 5. Sample2 Informs you the Ending Sample Number of the last scanned section of the EDF
- 6. # Samples Informs you the total number of samples of the last scanned Section of the EDF
- 7. Age Informs you the Age that was utilized for the ZBuilder File
- 8. **Reserved3 -** Reserved for future use
- 9. Reserved4 Reserved for future use
- 10. Reserved5 Reserved for future use
- 11. Reserved6 Reserved for future use
- 12. Reserved7 Reserved for future use
- 13. Reserved8 Reserved for future use
- 14. Filters Lists the Names of the filtered bands that were included in the ZBuilder File
- 15. Filt Active Lists whether a Filtered wave form is active or not. 1 means that it is Active and 0 means

### that it is not active

- 16. Flow Defines the Low Frequency for the Filtered Waveform
- 17. FHigh Defines the High Frequency for the Filtered Waveform
- 18. Order Defines What Filter Order was used for the Filtered Waveform

#### **Scalars Section**

- 1. **Channel Section –** This section will display the labeling for all of the Channels that have been collected from using the analyze system.
- 2. **Value Section –** This section will display the label for the information that has been collected in the Frequency Band Section
  - a. FLOW Also known as Frequency Low. This is the lowest range of the frequency band
  - b. FHIGH Also known as Frequency High. This is the highest range of the frequency band.
  - **c. MEAN.X** This is the average of Amplitude for the particular band, where "X" is that particular Channel number.
  - **d. AVGRMS.X** This is the average RMS value for the particular band, where "X" is that particular Channel number.
  - e. **AVGPKPK.X** This is the average Peak-To-Peak value for the particular band, where "X" is that particular Channel number.
  - **f. MIN.X** This is the minimum value seen for the particular band, where "X" is that particular Channel number.
  - **g. MAX.X** This is the maximum value seen for the particular band, where "X" is that particular Channel number.
  - **h. MEANF.X** This is the percent of power for the particular band over the entire frequency range, where "X" is that particular Channel number.
  - **i. STDF.X** This is the Standard Deviation of the percent of energy for that particular band, where "X" is that particular Channel number.
  - **j. MEANMF.X** This is the Modal Frequency for the particular band, where "X" is that particular Channel number.

#### **Similarities Section**

**PLEASE NOTE:** There will be a Tab for each Waveform. In order to see this information, you will have to see them individually.

- 1. **Similarity Type –** Displays the type of Similarty being viewed. There are six (6) different types looked at.
  - a. Phase Similarity
  - b. Training Coherence
  - c. Correlation
  - d. Phase Classic
  - e. Pure Coherence
  - f. Comodulation
- 2. Site Locations Shows the different locations that were used in the ZBuilder.
- Mean Information The Bottom-Half of the readings gives you the Average amplitude for the particular site combination.
- 4. **Standard Deviation Information –** The Top-Half of the readings gives you the standard deviation of amplitude for the particular site combination.

#### **Band Ratios Section**

- 1. **Channel Section** This section will display the labeling for all of the Channels that have been collected from using the ZBuilder system.
- 2. **Value Section** This section will display the label for the information that has been collected in the Frequency Band Section
  - **a. MEANL.X** This is the Log of the average of Amplitude for the band ratio, where "X" is that particular Channel number.
  - **b. STDL.X** This is the Log of the Standard deviation of the Amplitude for the band ratio, where "X" is that particular Channel number.
- 3. Ratio Section This section will show all band ratios (as defined by the Which Filters to use Sec-

tion), and their collected information

#### **Voxels Section**

- 1. Voxel Number This section containsl the labeling for all of the Voxels
- Frequency Section This section will show all bands (as defined by the Which Filters to use Section), and their collected information.
  - **a. BAND.AVG** This is the average of amplitude for the particular band, where "BAND" is the band as defined by the Which Filters to use section.

#### **ROI Amplitudes Section**

- 1. ROI Name This section contains the labeling for all of the ROIs
- 2. **Frequency Section –** This section will show all bands, and their Average Amperage broken down in the following order
  - a. BAND.L Average Amperage for the Left portion of the ROI
  - b. BAND.R Average Amperage for the Right portion of the ROI
  - c. BAND.LR Average Amperage for the entire ROI

ROI Name 1	ROI No 2	LRB 3	Frontal Lo	Frontal Lobe			Limbic Lobe

#### **ROI Coherence Section**

**PLEASE NOTE:** There will be a Tab for each Waveform. In order to see this information, you will have to see them individually.

- 1. ROI Name This section contains the labeling for all of the ROIs
- 2. ROI Number This section shows the BrainMasters assigned Internal ROI Number.
- 3. LRB This section Identifies the ROI's Location, left, right, or both.
- 4. **Mean Information –** The Bottom-Half of the readings gives you the Average Coherence for the particular ROI combination.
- 5. Standard Deviation Information The Top-Half of the readings gives you the standard deviation of amplitude for the particular ROI combination.

#### **ROI Z-Scores Section**

- 1. ROI Section This section contains the labeling for all of the ROIs
- 2. Frequency Section This section will show all bands, and their Standard Deviations broken down in the following order
  - a. BAND.L Standard Deviation for the Left portion of the ROI
  - b. BAND.R Standard Deviation for the Right portion of the ROI
  - c. BAND.LR Average Standard Deviation for the entire ROI

You have now created an Analysis File. You will be able to tell this has been created, based on the Report type that you chose. If Excel/XML or 1Hz bins CSV was chosen, then you will be able to utilize Windows Explorer to navigate to the patients directory and find the created files. If Excel/Live was chosen, then Microsoft Excel will open with the Requested information, for you to save as you would like. If Quick File was chosen, then a Built-in Spreadsheet application will open for you to be able to review the information. **\*\*\*PLEASE NOTE:** You will not be able to save the information if

you choose Quick File.

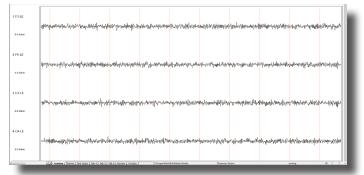

### **Software Themes**

**\*\*\*PLEASE NOTE:** At this current version of software The Creating custom themes is not fully functioning.

Currently, there are three pre-built Themes to choose from. This can be located on the Training Screen by clicking the Themes Tab, and then choosing the options from the Select built in theme.

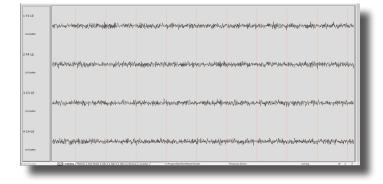

### **Built-In Themes**

## **BMZ Files**

## **BMZ Files**

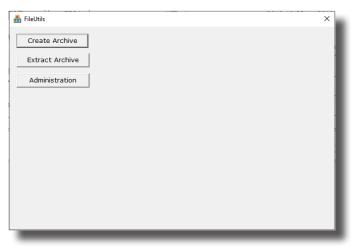

### **Creating A BMZ from a Study File**

1. From the Setup Screen, click the Folder Selection Button or Folder Tab. This will bring you to the Select Folder Screen. On this screen, click the Archiving setting that makes most sense for what you are accomplishing.

Session Librarian					
a Administer Session Genie	Push Selected Study to Server and Delete	C	Archive Selected Study	d	Archive Selected Study and Delete

- **a.** Administer Session Genie Choosing this option will open the BMz System to be operated only through the application. This is an Advanced Option not reccomended for users.
- **b.** Push Current/Selected Study to Server and Delete This will create a BMZ file for either the Current Study the Software has open, or a Folder that has been selected in the Folder Selection Interface, and will delete the folder from the Patient Directory.
- **c.** Archive Current/Selected Study This will create a BMZ file for either the Current Study the Software has open, or a Folder that has been selected in the Folder Selection Interface, and walk you through the next steps.
- **d.** Archive Current/Selected Study and Delete This will create a BMZ file for either the Current Study the Software has open, or a Folder that has been selected in the Folder Selection Interface, and will delete the folder from the Patient Directory.

2. When the BMZ Application Open, choose Create Archive Button (Selection A only).

3. On the next screen, click the Select Study Button to utilize the File Selection system to select the proper Folder for Archiving. When selected, click the OK button to return to the BMZ App, aclick Create Archive to continue (Selection A only).

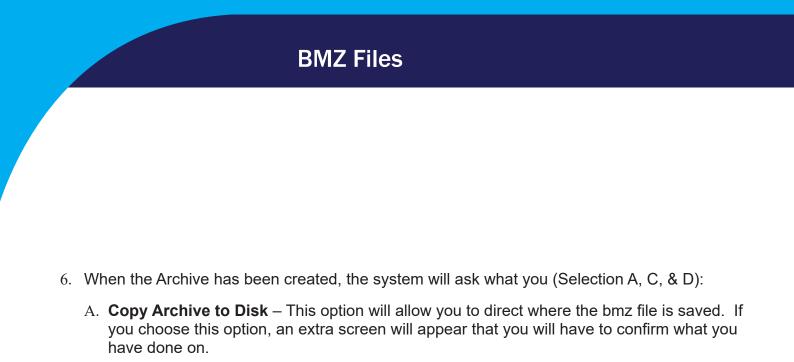

Click on 'Create Archive' to continue or select a different study.         Study       c:\ProgramData\BrainMaster\Studies\Temporary Session\*.*         Select Study       Create Archive       Cancel         Study 'Unknown' is being archived to c:\ProgramData\BrainMaster\archive. # The BMZ App will then ask to confirm that you have the proper folder for Archiving. Click Continue/Confirm to begin the Archive Process (Selection A, C, & D).

hileUtils	×
Click on 'Continue/Confirm or 'Cancel'	
Study c:\ProgramData\BrainMaster\Studies\SoundTesting\*.*	
Select Study Continue/Confirm Cancel	
This procedure will write an archive file for study "SoundTesting". Study Name: SoundTesting You may then copy the archive to disk or email it to a recipient	^
	~

5. The Archive system will now begin. Depending on the size of the folder, will be dependent on the length of time this will take. The system will continue when the Archive is complete.

💑 FileUtils	×
Click on 'Continue/Confirm or 'Cancel'	_
Study c:\ProgramData\BrainMaster\Studies\SoundTesting\*.*	-
Select Study Continue/Confirm Cancel	
Adding c:\ProgramData\BrainMaster\Studies\SoundTesting\f0100102.e20 to c:\Program Adding c:\ProgramData\BrainMaster\Studies\SoundTesting\f0200102.e20 to c:\Program Adding c:\ProgramData\BrainMaster\Studies\SoundTesting\k0100102.k20 to c:\Program Adding c:\ProgramData\BrainMaster\Studies\SoundTesting\k0200102.k20 to c:\Program Adding c:\ProgramData\BrainMaster\Studies\SoundTesting\settings to c:\ProgramData Adding c:\ProgramData\BrainMaster\Studies\SoundTesting\settings.667.bdb2 to c:\Program	

B. **Email Archive** – In order for this to work properly, two things are needed. First, proper E-mail information needs to be filled in from the Login page(See attached Picture). Second, the E-Mail account has to be tied through Microsoft Outlook.

(Optional)	Personal Information:
Name:	Robert Milicia
Email:	robm@brainm.com

- C. **Copy Archive to Server** This is the option that most people will use. This will still create the BMZ, but it will not E-Mail it, or save it to a specified location, it will simply create the BMZ File at C:\ProgramData\BrainMaster\archive
- 7. After you have made your selection, it will now finalize the Archive process. Depending on the size of the folder, will be dependent on the lenght of time this will take. The system will continue when the Archive is complete

🔒 FileUtils	$\times$
Click on Exit	
Study c:\ProgramData\BrainMaster\Studies\SoundTesting\*.*	
Exit	
Study SoundTesting was saved to the server	^

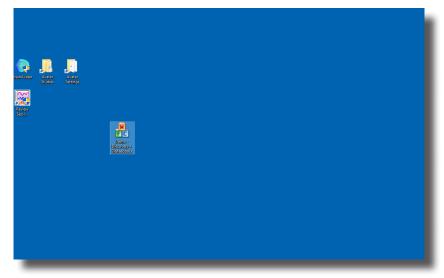

You now have a BMZ file created. You will be able to tell this is complete by seeing the achive of the folder in c:\ProgramData\BrainMaster\archive. Or, if you directed to another location, you will be able to find this file in this location.

#### **BMr Extras**

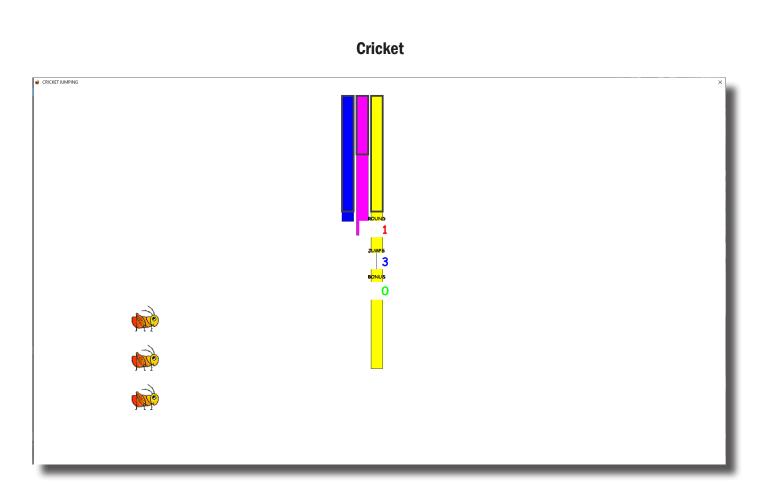

#### **BMr Contributed Games**

- 1. Reset Button Click to make the blue squares visible. This can also be performed by clicking Alt + R.
- 2. Choose Image Button Click to place a new image behind the blue squares. This can also be done by clicking Alt + C.
- **3. Difficulty Check Box** Check to change the difficulty. If the difficulty is checked on, then the customer must score two points to reveal a piece of the picture.
- 4. Pause Button Click to pause the game in progress. This can also be performed by clicking Alt + P.
- 5. Start Button Click to start the game. This can also be performed by clicking Alt + S.
- 6. **Display** This is display, which is a square covered with 130 small blue squares. The puzzle will be revealed one square every time a point(depending on difficulty) is scored in the Brain-Master software.

- 1. Interceptor The Interceptor Rocket will advance when points are not being scored.
- 2. Lunar Lander The Lunar Lander will advance whenever points are scored. The object is to get the lander to the top of the screen before the interceptor.
- 3. Score Board Section that keeps track of how many times each ship wins the race.
- 4. Start Button Click to start the game. This can also be performed by clicking Alt + S.
- 5. Pause Button Click to pause the game. This can also be performed by clicking Alt + P.
- 6. **Change Background Button –** Click to choose between several background images for the screen. This can also be performed by clicking Alt + B.
- Choose Sound Button Click to choose an explosion sound(if you desire) for when the lander wins the race. There are several that are included. This can also be performed by clicking Alt + C.
- 8. **Hide Controls Button –** Click to shrink the screen and obscure the control buttons. This can also be performed by clicking the Alt + H. To get the controls back, click Alt + "=".

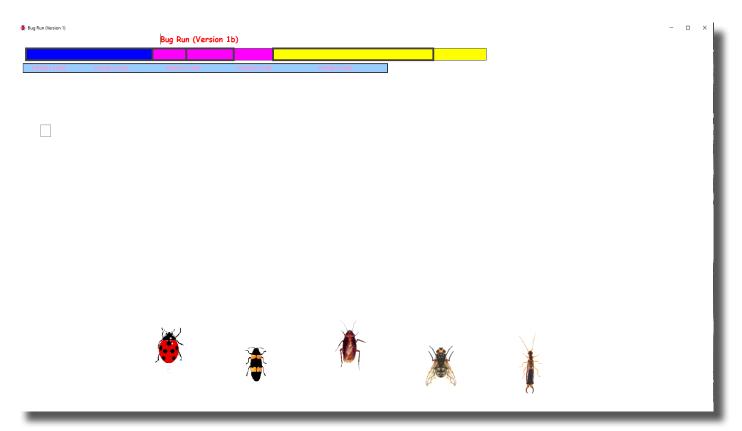

As training proceeds, the crickets "stack up" and pile on top of each other.

Later on, the bottom images change, bonus points are awarded, and the screen becomes more interesting.

18

#### **Bug Run**

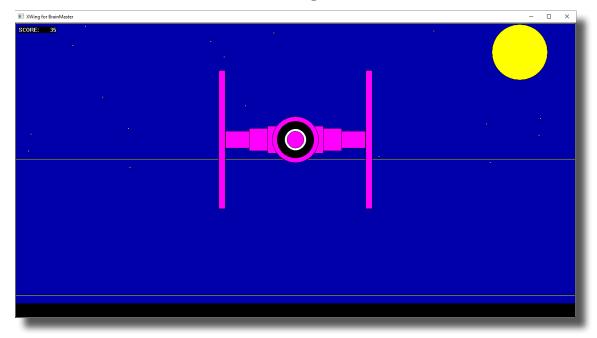

This screen provides a "bug race". As the trainee meets the training criteria, the bugs will advance at random, running a race. If the trainee has excessive amounts of "stop" component, some of the bugs will slip down a bit, and fall behind. The goal of the game is to have the race progress.

After a while, one of the bugs will win, and be declared the winner.

#### **BMr Popups Displays**

#### X-Wing

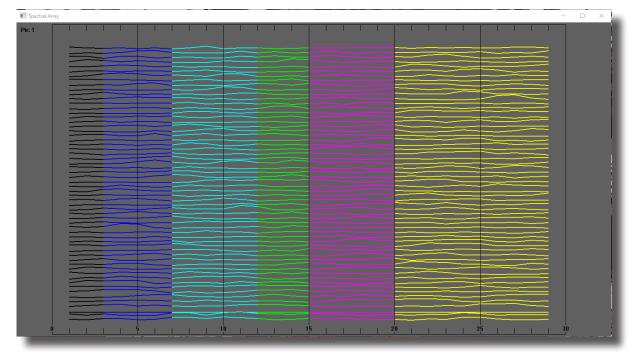

#### Display Type: Game

Requirements: Basic amplitude training

**Brief Description:** The space ship will rise when the reinforced component (e.g. lobeta or beta) is high, and the ground will rise when the inhibited component (e.g. theta) is high. Both thresholds are shown as lines on the screen. When a point is scored, the spaceship will briefly turn red, and the point will be registered in the indicator area. When two channels are trained, this window shows two space ships, with the left panel showing Channel 1, and the right panel showing channel 2.

#### **2D Spectral**

#### **Display Type:** Display

**Requirements:** Basic amplitude training

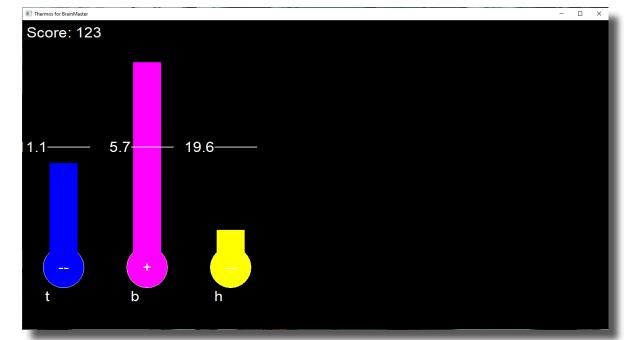

**Brief Description:** This provides a cascade of past FFT spectra, covering the previous 1 minute of activity. Each frequency band is colored according to the frequency ranges selected. This coloring is the same as used on the FFT and the BrainMirror displays. There are tic marks and the labels to identify the frequency coordinates of the display. When two channels are used, two spectra are shown.

Numbers								
<b>N</b>	_		×					
Ν	Chan1 Micro /Olts		Ratio					
USER:								
GAMMA:								
HIBETA:	13.3							
BETA:	8.9							
LOBETA								
ALPHA:								
THETA:								
DELTA:								
Hide Ratios	6							

#### **Display Type:** Display

**Requirements:** Basic amplitude training

**Brief Description:** This screen shows numeric values for each component. "GO" components are shown in green. "STOP" components are shown in red. All other components are shown in blue. The values are "damped", so they do not change too quickly. Ratios to theta can be shown by selecting the bottom text with the mouse. In 2-channel mode, it shows both channels.

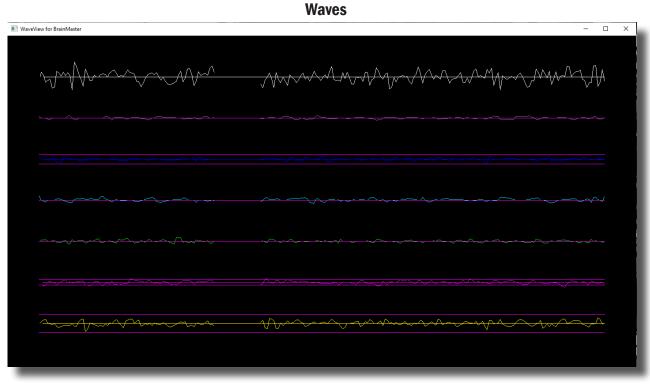

## Thermos

**Display Type:** Display

Requirements: Basic amplitude training

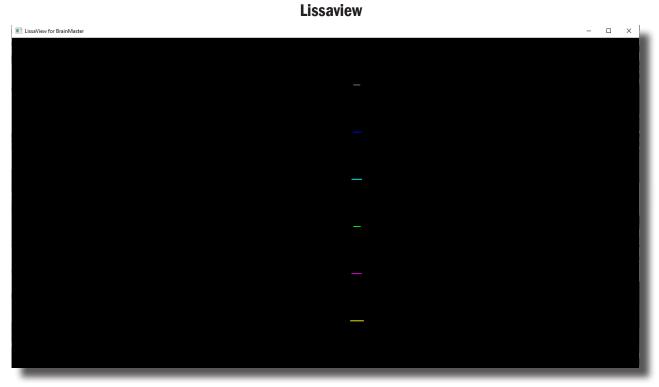

**Brief Description:** This window shows each of the major EEG component intensities as a bar graph with real-time response. "GO" components show a "+" in the bottom of the thermometer. "STOP" components show a "-" in the bottom of the thermometer. Un-trained components will not be shown in this screen.

#### Display Type: Display

**Requirements:** Basic amplitude training

**Brief Description:** This window shows the raw and filtered EEF waves in a resizable window. The display scal can be changed using the "+" and "-" keys, as usual. When two channels are used, both channels appear.

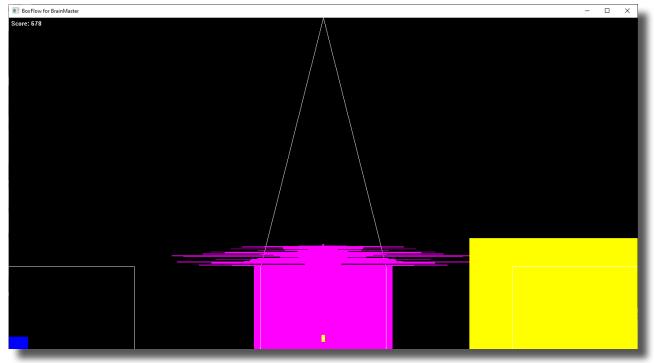

**Display Type:** Display

Requirements: Basic amplitude training

**Brief Description:** This is a 2-dimensional display, using "rate of change" in place of the time axis. The vertical axis is exactly the same as in the EEG waveform display, while the horizontal axis is the first derivative of the EEG signal.

Display Type: Game

**Requirements:** Basic amplitude training

**Brief Description:** This is similar to that used in other common displays. The center box gets wider and narrower, so you can see the past history of the enhance band. You want it wide, to meet the threshold. The outer boxes are the "inhibits" and you want them small. If they get large, they encroach on the inner box, which inhibits feedback. When two channels are used, two "BoxFlows" appear.

19

#### MiniBMirror

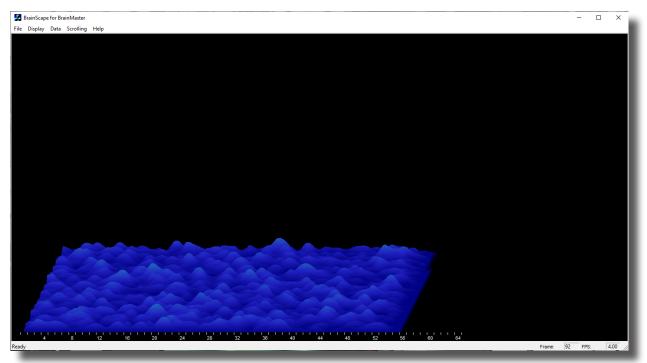

Display Type: Display

**Requirements:** Basic amplitude training

**Brief Description:** This window shows the BrainMirror in a resizable window. It uses the FFT to show the current EEG component values. The BrainMirror window also works in 2-channel mode.

#### **BrainScape**

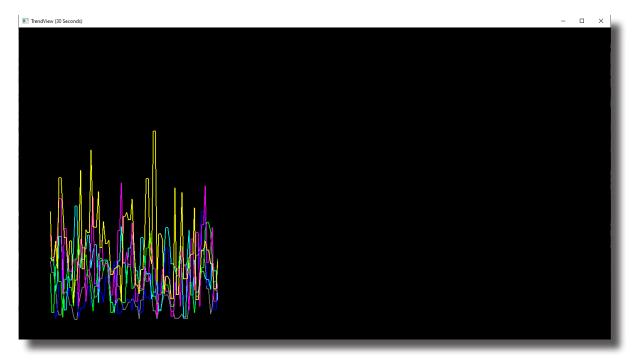

**Display Type:** Display

**Requirements:** Basic amplitude training

**Brief Description:** BrainScape is designed to provide a 3-dimensional time/frequency representation of EEG signals, using a combination of frequency analysis, spline interpolation, and color-coded representation of signal amplitude. When two channels are used, a BrainScape for both channels appears. In two channel mode, when Sum/Difference channel mode is used, the two signals viewed are transformed into their sum and difference signals, and displayed in the usual manner.

#### **TrendView**

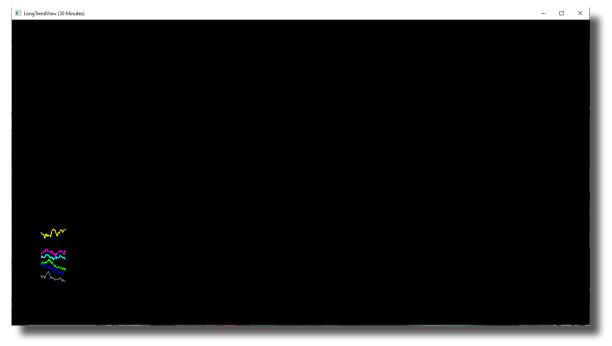

Display Type: Display

**Requirements:** Basic amplitude training

**Brief Description:** This shows the current and past activity of a component, in a plot of value vs. time, over a period of 30 seconds. After the plot reaches 30 seconds, it clears and redraws. The plot window displays only those components that are currently selected. When two channels are used, both appear on the display.

19

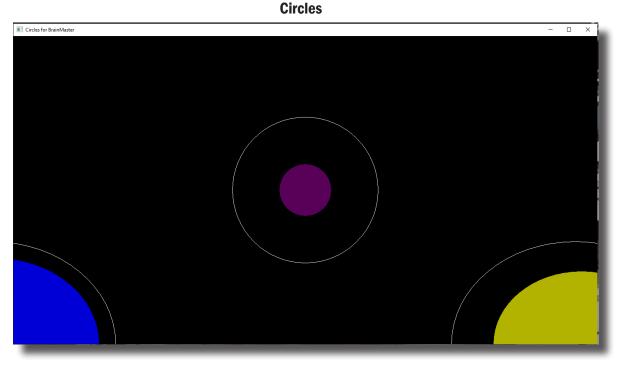

#### LongTrend

#### Display Type: Display

**Requirements:** Basic amplitude training

**Brief Description:** This shows the current and past activity of a component, in a plot of value vs. time, over a period of 30 minutes. After the plot reaches 30 minutes, it clears and redraws. The plot window displays only those components that are currently selected. When two channels are used, both appear on the display.

#### Display Type: Game

Requirements: Basic amplitude training

**Brief Description:** The Circles Window is similar to the BoxFlow, in that the center feature shows the main "uptrained" component, while the outer features show the high and the low "inhibits". When two channels are used, this window adapts, to show the two "uptrained" components as an ellipse (width represents channel 1, and height represents channel 2). In addition, the total of 4 inhibits are shown in the corners. Channel 1 inhibits are shown on the left, and channel 2 inhibits are shown on the right

FlashPlayer for BrainMaster		
File Edit View Help		
Game:	Protocol Type: Game	: Type:
Balloons.swf	🔹 Standard BMr 💽 BIOP	'lay 🔹

The Flash Player will now be running with the BrainMaster Software. You will be able to tell this has been successful, as the FlashPlayer Player for BrainMaster for BrainMaster Window will open, and the chosen Video file will play. Please make sure for proper use, the the Protocol Type, as well as the Game Type are properly set for optimal performance.

#### **Flash Player Games**

#### **Color Quest (Adventure Games)**

- Blimp Once a blimp has launched, the user will cause it to move every time its green progress bar fills up. When the blimp moves, it will move in the direction of the Colorful Ring(accuracy is dependent on user feedback). When the blimp hits the ring, it will change color. After 10 hits, the blimp will "spin out", causing it to disappear, restoring color to the game screen. There are 6 total blimps.
- 2. **Launch Pad –** When there is no blimp on-screen, the user must fill the green progress bar in the topleft corner. Once this happens, a new blimp will launch from the Launch Pad. Also, the pink lights on the Launch Pad will illuminate when the user meets the requisite feedback conditions.
- 3. **Colorful Ring –** This ring is the target of the blimp. When the blimp hits it, the blimp will change color. Also, the ring will spin when the user meets the required feedback conditions.
- 4. **Progress Bars –** These progress bars measure the overall feedback of the user. The "rainbow" feedback bar, on the left, displays the user's relative feedback for the last 3 seconds(i.e.: A full bar means the user met conditions 100% for the last 3 seconds, a half-bar means the user has met conditions 50% for the last 3 seconds, etc.). The green progress bar accumulates over time. If the user does not meet required conditions, the green progress bar will begin to descend. Filling the green progress bar once corresponds to 3 seconds of 100% feedback.
- 5. **Trophy Blimps –** As your blimp continually hits the Colorful Ring, three miniature models of your blimp will become visible, floating about in the background. They are purely aesthetic, and represent a visual reward for the user's hard work.
- 6. **Progress Panel –** The Progress Panel has six blimp-shaped outlines. As the user "completes" each of the six blimps, the blimp-shaped outline will be filled in with a gold blimp "token". This panel lets the user know how many blimps are left before the game is finished, as well as representing a visual reward for the user.

Similar Games - None

#### BrainCats 2 (Racing Games)

**Opening Screen** 

- 1. Select Cat Section Section where you select the cat who will run according to the user feedback.
- Race Length Section Section where you choose the length of the race. The non-user cats will take about this long to complete the race. Depending on the difficulty level and user feedback, the user could complete the race in a wide range of times. If the user meets the difficulty level consistently, they can be expected to take about as long as the non-user cats.
- 3. **Difficulty Setting –** Section where you set the difficulty. The difficulty corresponds to the percentage of client feedback that will put the player cat about "on par" with the race competition. The default value is 50%. For example: at a difficulty level of "25", the client will have to meet the required conditions about 25% of the time to keep up with their opponents in the race. As the client meets conditions more consistently, the chance of the client winning will also increase. So, in the case of "25", a client providing 35% feedback would have a good chance of winning the race.
- 4. **Sound On/Off Section –** Sections where you can control the sound settings for the game. The sounds act primarily as reward feedback, and appear in 5 different places during the game:
  - a. At the games start
  - b. At the result screen after a win
  - c. When the user earns the Monkey Trophy
  - d. When the user earns the Elephant Trophy
  - e. When the user reaches the nighttime scenario
  - f. When the user wins after completing the nighttime scenario
- 5. Start Race Button Click to begin the game after all settings are set to your desired settings.

Race Screen

- 1. **Sun/Moon Graphics –** This graphic will move through the sky as you win more races. Eventually, when the sun passes the mountains on the west side of the screen, day turns into night, and the process begins again with the moon.
- 2. **Trophies Graphics –** As you gain points, trophies begin to appear. When the client meets feedback requirements, the trophies animate. Each stage has nine trophies, with three models. For the daytime, these are the ladybugs, hummingbirds, and monkeys. For the nighttime, these are bees, doves, and elephants.
- Race Track Borders When the client meets feedback requirements, the borders of the race track will light up around the players selected cat.
- 4. **Statistics Section –** Here, you can see the user's performance for that game.

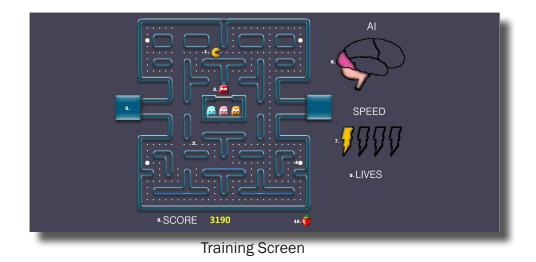

Similar Games - BrainCats, BrainCats 3D, Blimp Race, Blimp Race 3D

#### **BrainMan 2 (Arcade Games)**

- 1. **Automatic Gameplay Selection –** Click to choose the Automatic Gameplay mode. This is more akin to the original BrainMan for BrainMaster. BrainMan will move automatically across the board. His movements are a direct response to the user's feedback. In addition, the user's feedback over the last six seconds will govern the "intelligence" of BrainMan's AI, with a more consistent feedback resulting in a more effective BrainMan.
- 2. **Manual Gameplay Selection –** Click to choose the Manual Gamelay mode. This mode boasts a more arcade-style of gameplay, with the user directly controlling the movement of BrainMan.

- 1. **BrainMan –** This is BrainMan. He moves according to the feedback of the user. If the user does not meet specified feedback requirements, BrainMan will not move.
- 2. **Pills –** When all the pills on a stage have been eaten, BrainMan will move on to the next stage.
- 3. **Ghosts –** These familiar foes begin to freely move about the screen on Stage 3. Unlike the ghosts that you are used to, these pose no threat to BrainMan. They are extra points, and can be eaten. If the client is meeting the requirements, then the Ghosts will be a blue color and will be able to be consumed. They will turn in to a set of eyes and have to return to their "base" to regenerate.. If the client is not meeting the training requirements, then the Ghosts will be their normal colors. If during this time, they make contact with BrainMan, they will pass through him.
- 4. **Power Pill –** The Power Pill delivers a reward sound to the client, and has a small chance of increasing BrainMan's speed for the duration of the level.
- 5. **Maze –** In this version, even the maze borders respond to the feedback. As the client meets requirements, the borders will become brighter and more saturated. Conversely, as the clinet fails to meet requirements, the maze will grow dark.
- 6. **AI Level –** The AI is the controller of BrainMan's movement. It is based on a combination of three things: the client's relative feedback, the client's progress through the game, and the client's progress through the level. As these values increase, you will notice the Brain begin to "fill up". This means that BrainMan will actually become smarter, and hunt pills more effectively.
- 7. **Speed Level –** This is self-explanatory. Much like the Al Level, it is governed by both the client's relative feedback and progress through the game. It does not however, measure progress through the level. Instead, it has a chance to temporarily increase when the user eats a power pill.
- 8. **Score –** This number is raised by eating Pills, Fruit, and Ghosts.
- 9. Lives These do not affect gameplay. Rather, they function as "trophies". The user receives one life for every 8,000 points sored.
- 10. **Fruit** Each level boasts a particular kind of Fruit. It will appear in the center of the game board for a brief interval of time during every level. They can be eaten for extra points.

Similar Games - BrainMan, Board Game

204

#### **BrainFish (Collecting Games)**

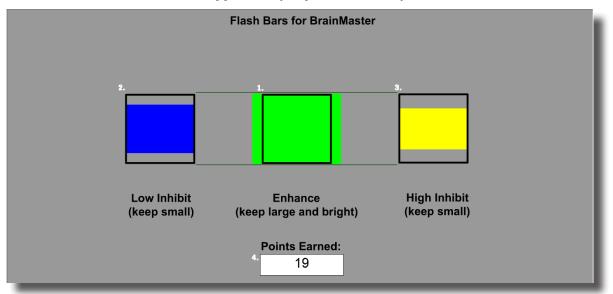

- BrianFish The BrainFish are created when the trainee meets the training criteria continuously for a certain period of time(approx.. ½ second). The fish are moving quickly when the criteria are met, and slow down otherwise. The number of fish reflects the success in keeping in state over a period of time. 25 fish create a trophy fish, and all fish disappear and the client begins to build a trophy fish again.
- 2. Trophy Counter This box counts the amount of Solar Systems that have been created.
- 3. Fish Counter Counter This box counts the amount of Planets that have been created.
- 4. **Score Counter -** This box counts the total Score that has been calculated by the system. This will work if you have Points set up.
- 5. **Trophys** This is where Trophys will appear after they have been collected. They will be a random color.

Similar Games - BrainPlanets, BrainPlanet1lite, BrainPlanets2, BrainPlanets2lite, BrainCell, NeuroPet

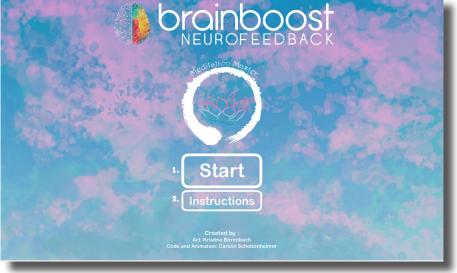

#### **App Boxes (Amplitude Games)**

- 1. **Enhance Box –** Shows a box that represents the enhance band. This will increase and decrease in size horizontally, depending on your enhancement training.
- Low Inhibit Box Shows a box that represents the low inhibit band. This will increase and decrease in size vertically, depending on your low inhibit, and will also have an effect on the Enhance Box. When the inhibit goes above the threshold, they cause the Enhance Box to become dimmer. When both Inhibit boxes are above threshold, the Enhance Box is maximally dark.
- 3. **High Inhibit Box -** Shows a box that represents the High inhibit band. This will increase and decrease in size vertically, depending on your high inhibit, and will also have an effect on the Enhance Box. When the inhibit goes above the threshold, they cause the Enhance Box to become dimmer. When both Inhibit boxes are above threshold, the Enhance Box is maximally dark.
- 4. **Points Earned Box –** Box that displays the current amount of points that the client has earned during their training.

**\*\*\*Please Note:** This game is designed for use with Standard Amplitude Protocols only. If this is used with any other protocols, additional development is required via the Event Wizard.

#### **Meditation Master (Growth Games)**

**Title Screen** 

- 1. Start Button Click to proceed to the Character Selection Menu
- 2. Instruction Button Click to see very basic instructions that are beneficial for the clinician or Player

Character Select Screen

- 1. **Character Selection Menu –** Click on the Picture of the Meditator that you would like to utilize. Each Meditator has their own unique background and effects
- 2. Back Button Click to return to the Title Screen

**Training Screen** 

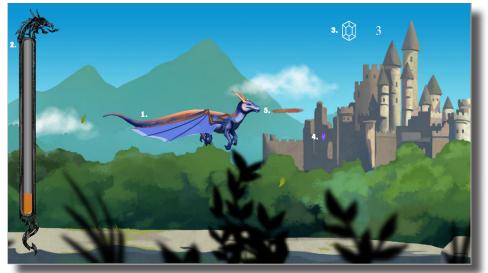

- 1. **Meditator –** As Training is successful, the Meditator will levitate themselves. As Training success is held, the Meditator will continue to levitate until they reach the top of the screen and will have a special animation.
- 2. **Progress Bar –** The progress bar has multiple Levels that can be reached. Each level they pass, the icons will grow, and cause a special animation in the background
- 3. **Score Section -** This is where you can see the clients total score. The score is not tied to the Brain-Master Point system and is its own system.
- 4. Level Animation When the client passes a level. The Level Animation will occur in the background of the level
- 5. **Background Effect** As the client is successfully meeting training, a special background image will pass through the level

#### NeuroFlight (Side Scrolling Games)

Title Screen

- 1. **Start Button –** Click on the Picture of the level that you would like to play. Each level has their own unique Flying Creature, background, and effects
- 2. Info Button Click to see very basic instructions that are beneficial for the clinician or Player

Training Screen

- 1. **Flying Creature-** As Training is successful, the Flying Creature will increase their elevation. As Training success is held, the Flying Creature will continue to elevate until they reach the middle of the screen and begin to perform a Special Animation
- 2. **Progress Bar -** The progress bar fills to the top. As they progress, the Flying Creature Evolves.
- 3. Score Section This is where you can see the total amount of Crystals collected, as well as the progress of new crystals and any special rewards.
- 4. **Crystal Animation -** When the client puts together a crystal. The Crystal Animation will occur in front of the Flying Creature.
- 5. **Special Animation Effect -** As the client is successfully meeting training, a special animation is added to the Flying Creature

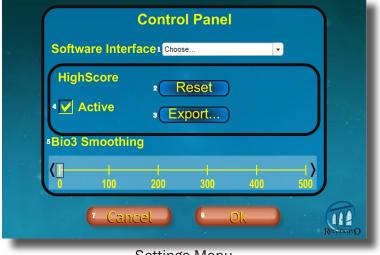

#### **Fission Balls (Interactive Games)**

Title Screen

**\*\*\*Please Note:** All Interactive Games Require interaction from the user. Either the mouse or the Keyboard. So, if this will not be possible during the session, please do not use these games

- 1. **BioPLAY (Start Button)** Click on the button go launch the Settings menu to assure settings for use.
- 2. High Score Button Click to see the high scores of all prior players on the current PC.
- 3. Settings Button Click on this button to change settings without beginning a new game.

Settings Menu

**\*\*\*Please Note:** All Interactive Games Require interaction from the user. Either the mouse or the Keyboard. So, if this will not be possible during the session, please do not use these games

- 1. **Software Interface** Set selection to BrainMaster 3.0. This works with all versions of BrainMaster Software
- 2. High Score Reset Button Click to delete all High Scores
- 3. High Score Export.. Button Click to export all previously recorded High Scores
- 4. Active Check Box Click on if you would like High Scores to be tracked, and un-click if you do not want high scores tracked
- 5. **Bio3 Smoothing** Bio3 is a Proportional Control. By adjusting the Smoothing, you can control the speed at which that the data comes in.
- 6. **OK Button** Click on to move to the Instruction Menu, or the Title Screen, if the Settings Button was clicked
- 7. Cancel Button Click on to cancel any selections made and return to the Title Screen.

**\*\*\*Please Note:** All Interactive Games Require interaction from the user. Either the mouse or the Keyboard. So, if this will not be possible during the session, please do not use these games

- 1. Software Interface Basic instructions for the client.
- 2. BioPLAY Button Click to begin the Training

**\*\*\*Please Note:** All Interactive Games Require interaction from the user. Either the mouse or the Keyboard. So, if this will not be possible during the session, please do not use these games

- 1. Ship The Ship that you pilot to destroy the Balls
- 2. **Fission Balls** As they blow up, they split and continue to fall. The game is over when they all fall below the ship
- 3. Bio Control Menu Shows the current output for the ship
- 4. Score Shows the current score for their current session
- 5. **Protocol Type** This needs to be set properly for proper output. If a Z-Score this must be set to LZT LiveZScore.
- 6. Sound Output To turn on or off Sound output from the game
- 7. ? Button Click to open the Instructions Menu

5. Setup the sounds and bands as you would like them. When the set-up is complete, click the Start Session Button.

You have now set up the EEGAudio for use with the BrainMaster Software. You will be able to tell this has been successful, as EEGAudio will be having numbers, and you have chosen will be playing as the requirements are met.

#### **Dimmer Control Menu**

- 1. Maxed Dimmed Section Section where you can set the percentage that the Dimmer Window will dim.
- 2. **Dimming Speed Section –** Section where you can set the speed that the Dimmer Window will dim.
- 3. Help Button Opens simple Help instructions for the Dimmer.
- 4. **Open Button –** Click to open the Dimmer Window.

#### **Using Dimmer**

1. Setup the training that you would like to use, or choose an existing folder that you would like to us, and click the "Run The Next Session" Button.

BrainAvatar Setup			×

You have now set up the Dimmer for use with the BrainAvatar Software. You will be able to tell this has been successful, as the Dimmer Window will be modulating from see through, to not see through, based on whether the training is being met. At this point, you may move the Dimmer Window on top of whatever Application you would like to be Dimmed. **\*\*\*PLEASE NOTE:** The Dimmer Window sits on top of the Application. This means that this will not function with applications that require Mouse Clickthrough. It can function with Keyboard functionalities. So, long as the Application has Application Focus. This requires you to position in a way that you can make the Application the Main Window.

### **Z-Score Training**

#### **Activating ANI Z-Score Training DLL**

**\*\*\*PLEASE NOTE:** These steps only need to be followed when using the ANI Z-Score Training DLL. This is not required for any other Z-Score Training DLL. ANI Z-Score DLL can only be activated on 2 Computer Systems. Please be sure before activating, that you are doing this on the system that you want this to be on

1. From the Setup/Home Screen, click the Folder Selections Button

#### Single Tab Design - Z-Score Using PercentZOK or PZOKUL

- 1. **Z-ScorePZOK/PZOKUL (Teal Line & Teal Thermometer) –** This line and thermometer is the Percent of Z-Scores with-in the defined range
- 2. **Z-Score Threshold (Green Line & Green Marker on Thermometer) –** This line is the threshold for the Z-Scores. When the Z-Scores are below the threshold, the system will reward the client with the chosen reward. This can either be controlled by the "C" key or Dynamically (On its own).
- 3. Percent of Reward (Red Line & Red Thermometer) This line and thermometer shows the percent time that the Z-Scores are greater than the Z-Score threshold.
- 4. **Z-Score Range Definer or Z-Score Upper Range (Orange Line & Orange Thermometer) –** This line defines the range of Z-Scores that you are training. This is controlled by the "U" key, or by dragging the orange marker on the Thermometer. If this is a PZOKUL Protocol, this line defines the upper range of the Z-Score Range.
- 5. **Z-Score Lower Range (Yellow Line & Yellow Thermometer) –** This line is only available in PZOKUL protocols and defines the lower range of Z-Score Range. This is controlled by the "L" key, or by dragging the yellow marker on the Thermometer.
- 6. **Z-Score Text Stats -** This gives the moving average values of the Z-Scores for a particular metric.
- 7. Acquired EEG This will show the EEG and relevant information to the EEG

#### Multi-Tab Design - Z-Score Using PercentZOK or PZOKUL

- 1. **Z-ScorePZOK/PZOKUL (Teal Line & Teal Thermometer) –** This line and thermometer is the Percent of Z-Scores with-in the defined range
- 2. **Z-Score Threshold (Green Line & Green Marker on Thermometer) –** This line is the threshold for the Z-Scores. When the Z-Scores are below the threshold, the system will reward the client with the chosen reward. This can either be controlled by the "C" key or Dynamically (On its own).
- 3. **Percent of Reward (Red Line & Red Thermometer) –** This line and thermometer shows the percent time that the Z-Scores are greater than the Z-Score threshold.
- 4. **Z-Score Range Definer or Z-Score Upper Range (Orange Line & Orange Thermometer) –** This line defines the range of Z-Scores that you are training. This is controlled by the "U" key, or by dragging the orange marker on the Thermometer. If this is a PZOKUL Protocol, this line defines the upper range of the Z-Score Range.
- 5. **Z-Score Lower Range (Yellow Line & Yellow Thermometer) –** This line is only available in PZOKUL protocols and defines the lower range of Z-Score Range. This is controlled by the "L" key, or by dragging the yellow marker on the Thermometer.
- 6. **Z-Score Text Stats -** This gives the moving average values of the Z-Scores for a particular metric found on another tab.
- 7. Acquired EEG This will show the EEG and relevant information to the EEG found on another tab.

#### **Changing Surface Sites**

1. From the Setup Menu, click Settings Tab, then click the Z-Scores Tab. Here, you can control:

- a. Z-Score Type Here, is where you can choose the type of Z-Score Training.
- b. Z-Score Options Here is where you can choose between 4 Channel Z-Score Method, and Up to 19 Channel Z-Score Method, VoxelZ-Score Method (BrainDX or qEEGPro), or ROI Connectivity (qEEGPro Only). If 4 Ch or 19 Ch is chosen, you will use this tab set what sites, values and bands to train.
- c. Acquired & LZT Trained Sections As you choose sites that are being acquired from the Acquisition Tab, they will populate in the Acquired Section. From here, you can place them into the LZT Trained section. You can do this for each individual site by highlighting the location, and clicking the Add→ Button. If you would like to add all electrodes, then click the Add All Button. \*\*\*PLEASE NOTE: If you change which sites are being acquired after you have set what is to be LZT, you will have to adjust the LZT Trained Z-Scores. The same controls apply if removing a site or sites to be LZT Trained.
- d. Trained Values Section Here you can choose which trained values will be used for the LZT Training. You can check on or off any of the values. This will affect the total amount of Z-Scores being trained.
- e. Trained Bands Section Here you can choose which trained bands will be used for the LZT Training. You can check on or off any of the values. This will affect the total amount of Z-Scores being trained.

When all settings are as you would like them, confirm the changes.

2. If you would like to change other settings (Age/eye condition), this can be done in the Edit Folder Info Tab. From the Setup Menu, click the Folder Tab, and click the Edit Folder Info Tab. Here, you will be able to change these things. When completed, confirm the changes.

#### **Data Dictionary**

Standard variables computed in real time using BrainMaster	built-in filter for up to 4 Channel Training (AKA Legacy Variables)						
D, T, A, L, B, H, G, U	channel 1 amplitude (from digital filters) for 8 components						
DELTA, THETA, ALPHA, LOBETA, BETA, HIBETA, GAMMA, USER	channel 1 amplitude (from digital filters) for 8 components						
DTHR, TTHR, ATHR, LTHR, BTHR, HTHR, GTHR, UTHR	channel 1 thresholds (from digital filters built-in autothresholder						
DX, TX, AX, LX, BX, HX, GX, UX	channel X amplitude (from digital filters) for 8 components						
DELTAX, THETAX, ALPHAX, LOBETAX, BETAX, HIBETAX, GAMMAX, USERX	channel X amplitude (from digital filters) for 8 components						
CXDA, CXTA, CXAA, CXLA, CXBA, CXHA, CXGA, CXUA	channel X amplitude (from digital filters) for 8 components						
CXDF, CXTF, CXAF, CXLF, CXBF, CXHF, CXGF, CXUF	channel X modal frequency (from FFT) for 8 components						
CXDE, CXTE, CXAE, CXLE, CXBE, CXHE, C1GE, C1UE	channel X percent energy (from FFT) for 8 components						
CXDP, CXTP, CXAP, CXLP, CXBP, CXHP, CXGP, CXUP	channel X percent time over threshold (using digital filters)						
CXDT, CXTT, CXAT, CXLT, CXBT, CXHT, CXGT, CXUT	channel X thresholds (from digital filters built-in autothresholder						
CXDV, CXTV, CXAV, CXLV, CXBV, CXHV, CXGV, CXUV	channel X variability (from digital filters)						
Standard functions computed in real time using BrainMaster	built-in filter for up to 24 Channel Training						
TrnAmplitude(X, Y) or TrnA(X, Y)	Channel X amplitude for the Y band						
TrnThreshold(X, Y) or TrnT(X, Y)	Channel X Threshold for the Y band						
TrnModalFreq(X, Y) or TrnF(X, Y)	Channel X Modal Frequency for the Y band						
TrnPercentTime(X, Y) or TrnP(X, Y)	Channel X percent time over threshold for the Y band						
TrnVariability(X, Y) or TrnV(X, Y)	Channel X variability for the Y band						
Standard functions for Acquired EEG							
Acquired(x)	Returns the instantaneous acquired signal in micro- volts. The channels number is in the order that the software is acquired (ie: Acquired(1.0) is always Fp1, Acquired(2.0) is always F3).						

itandard variables for difference channel (not yet implemented)							
DS, TS,DELTAS, THETAS,CSDA, CSTA,CSGV, CSUV	The sum of channels 1 and 2 is always computed and available. Sum Channel repeats all channel1 variables shown above, with "1" replaced by "S"						
DD, TD,DELTAD, THETAD,CDDA, CDTA,CDGV, CDUV	The difference of channels 1 and 2 is always computed and avail- able. Difference Channel repeats all channel1 variables shown above, with "1" replaced by "D"						
Cross-channel standard variables for up to 4 Channel Trainin	g (AKA Legacy Variables)						
Note: use first channel to designate the pair (X=channels $X/X+1$ )							
СТ	Coherence Threshold currently in use in built-in coherence processor. This will automatically track any changes in the coherence threshold.						
DCOH, TCOH, ACOH, LCOH, BCOH, HCOH, GCOH, UCOH	Coherence (currently selected type) between channels 1 and 2						
CXDC, CXTC, CXAC, CXLC, CXBC, CXHC, CXGC, CXUC	Coherence (currently selected type) between channels X and X + 1 $\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!\!$						
DPCOH, TPCOH, APCOH, LPCOH, BPCOH, HPCOH,GP- СОН, UPCOH	"Pure" coherence between channels 1 and 2						
DTCOH, TTCOH, ATCOH, LTCOH, BTCOH, HTCOH, GT- СОН, UTCOH	Similarity ("Training Coherence") between channels 1 and 2						
DSIM, TSIM, ASIM, LSIM, BSIM, HSIM, GSIM, USIM	Similarity ("Training Coherence") between channels 1 and 2						
DCOR, TCOR, ACOR, LCOR, BCOR, HCOR, GCOR, UCOR	"Spectral Correlation Coefficient" (SCC) between channels 1 and 2						
DCOM, TCOM, ACOM, LCOM, BCOM, HCOM, GCOM, UCOM	Comodulation (Sterman/Kaiser "SKIL" type) between channels 1 and 2						
DPHASE, TPHASE, APHASE, LPHASE, BPHASE, HPHASE, GPHASE, UPHASE	Phase between channels 1 and 2						
CXDH, CXTH, CXAH, CXLH, CXBH, CXHH, CXGH, CXUH	Phase between channels X and X + 1						

Standard Cross-channel functions for up to 24 Ch	nannel Training
TrnAA(X,Y,Z)	The Asymmetry of the Z Band between the X and Y Channel
TrnCO(X,Y,Z)	The Pure Coherence of the Z Band between the X and Y Chan- nel
TrnPH(X,Y,Z)	The Phase of the Z Band between the X and Y Channel
TrnCM(X,Y,Z)	The Commodulation of the Z Band between the X and Y Chan- nel
TrnTC(X,Y,Z)	The Training Coherence of the Z Band between the X and Y Chan- nel
DC and Slow Cortical Potentials Variables	·
DC1, DC2,	DC offset for Training channel 1, 2, 1 unit = 4 microvolts
DCE1, DCE2,	Enhanced DC for channel 1, 2, 1 unit = 1 millivolt
DCA1, DCA2,	DC Acquired channel 1, 2, 24 1 unit = 1 millivolt
DCALL	DC average of all 19 10-20 channels (Discovery Only)
DCFR	Frontal DC: Fp1 F3 F7 Fz Fp2 F4 F8 (Discovery Only)
DCBK	Back DC: P3 P4 Pz T5 T6 01 02 (Discovery Only)
DCLT	Left DC: Fp1 F3 F7 C3 T3 P3 T5 O1 (Discovery Only)
DCRT	Right DC: Fp2 F4 F8 C4 T4 P4 T6 O2 (Discovery Only)
DCFp1, DCFp2, DCF3, DCF4,	DC of any 10-20 site specified by name
Region of Interest Training Functions (Must have	BrainAvatar LLP License)
LoretaROIA(ROI,Band)	Trains the band activity at the chosen region of interest. The num- ber listing of the ROI's can be found at www.brainm.com/kb/en- try/461. The bands are 1 - Delta, 2 - Theta, 3 - Alpha, 4 - Lobeta, 5 - Beta, 6 - Hibeta, 7 - Gamma, 8 - User
LoretaROIAL(ROI,Band)	Trains the band activity at the Left Hemisphere of the chosen region of interest. The number listing of the ROI's can be found at www.brainm.com/kb/entry/461. The bands are 1 - Delta, 2 - The- ta, 3 - Alpha, 4 - Lobeta, 5 - Beta, 6 - Hibeta, 7 - Gamma, 8 - User
LoretaROIAR(ROI,Band)	Trains the band activity at the Right Hemisphere of the chosen region of interest. The number listing of the ROI's can be found at www.brainm.com/kb/entry/461. The bands are 1 - Delta, 2 - The- ta, 3 - Alpha, 4 - Lobeta, 5 - Beta, 6 - Hibeta, 7 - Gamma, 8 - User

Re	egion of Interest Coherence Training Functions (Must have BrainAvatar LLP and Connectivity Suite License)								
	LoretaROIACoh(ROI1, Location, ROI2, Location, Band)	Trains the Connectivity between the chosen region of interests and its location (Left, Right, or Complete). The number listing of the ROI's can be found at https://brainmaster.com/kb-entry/ id461/. The bands are in the order and the number that match on Bands Tab.							
	LoretaROIACohL(ROI1, ROI2, Band)	Trains the Connectivity between the Left Hemisphere of the chosen region of interest. The number listing of the ROI's can be found at https://brainmaster.com/kb-entry/id461/. The bands are in the order and the number that matches on Bands Tab.							
	LoretaROIAR(ROI1, ROI2, Band)	Trains the Connectivity between the Right Hemisphere of the chosen region of interest. The number listing of the ROI's can be found at https://brainmaster.com/kb-entry/id461/. The bands are in the order and the number that matches on Bands Tab.							
	LoretaROIALR(ROI1, ROI2, Band)	Trains the Connectivity between the chosen region of interest. The number listing of the ROI's can be found at https://brainmas- ter.com/kb-entry/id461/. The bands are in the order and the number that matches on Bands Tab.							
Val	ues from other events:								
	EXA	values of "antecedent" variables in Events. These are the selected component values, or the values of the " $x$ =" equation in the "IF" portion of the event design, where X is the Event Number that you would like to be utilized							
	EXB	"values of ""condition"" variables in Events. These are the selected component values, or the values of the ""x="" equation after the ""RULE"" portion of the event design, where X is the Event Number that you would like to be utilized"							
	EXF	values of flags for Events. These are 0 if the event's condition is not met, and 1.0 if the event's condition is met, where X is the Event Number that you would like to be utilized							
	EXP	percent time meeting the condition for Events. These allow any events to "see" how often other events are "true" and use these values in rules, where X is the Event Number that you would like to be utilized. Values are returned as percent, e.g. between 0 and 100							

Built	-in Event Control Variables							
11	NHFX, ENHFX, NUMEX	channel X training flags: number of "stops" meeting criteri- on, number of "gos" meeting criterion, number of possible "go's"						
A	ILLOK	Indicates that all "gos" are met, and no "stops" exceed threshold. Use e.g. "x=ALLOK" for Event 5, to allow games like BrainMan and BrainCell to work automatically with any amplitude-based protocol that is set up using the standard "Training Protocol" setup.						
Spec	ial Built-in Functions (note that "arg" can be any numbe	r or variable name, including other Event Values, flags, etc. etc.						
Z	Cor1(arg)	returns 0 if argument is <1, 1 otherwise. Note: when used with a fraction e.x. X/Y, returns 1.0 if X >= Y, 0.0 otherwise						
G	GT(arg)	returns 0 if argument is <1, 1 otherwise. Note: when used with a fraction e.x. X/Y, returns 1.0 if X >= Y, 0.0 otherwise						
R	Rng(arg1, arg2, arg3)	returns 0 if arg1 is within arg2 of arg3. E.g. Rng (C1AF, 0.5, 10) returns 1 if Channel 1 Alpha Frequency is within 0.5 Hz of 10 Hz. E.g. between 9.5 and 10.5 Hz, and returns 0 otherwise						
В	and(channel, low, high) or Band(channel, low, high)	returns total FFT energy in a band for a channel. E.g. Bnd(2, 4, 6) returns the energy in channel 2 between 4 Hz and 6 Hz						
N	<i>f</i> lodf(channel, low, high)	returns modal frequency ("first moment") from FFT in a band for a channel. E.g. Modf(2, 4, 6) returns the modal frequency in chan- nel 2 in band from 4 Hz to 6 Hz						
P	Peakf(channel, low, high)	returns peak frequency (highest amplitude) from FFT in a band for a channel. E.g. Modf(2, 4, 6) returns the peak frequency in channel 2 in band from 4 Hz to 6 Hz						
s	SetPhoticRate(rate) or SPR(rate)	sets rate of photic stimulation to value given by "rate"						
s	SetPhoticRates(left, right)	Sets rate of photic stimulation for the left and right independently						
s	SetPhoticEnable(left, right)	Enables or disables the right or left photic stimulation. 1.0 will enable, while 0.0 will disable						
s	SetPhoticAmplitudes(left, right)	Sets the photic amplitudes for the left and right independently						

Built-in Constants	
Schumann, SCH	Schumann Frequency = 7.81
PHI, GOLDEN, GM	Golden Mean = 1.618
PI	PI = 3.14159
Standard Operators: Note: all arguments a	nd parameters are treated as double precision floating point values
+-*/	add, subtract, multiply, divide
%	modulus returns the remainder after an integer division
^	power: $y = x^2$
()	parenthetical gropuing, unlimited, e.g. (2 + BETA) / THETA
;	semicolon, needed at end of each equation in formula
//	comment, single line
/**/	comment, multiple lines
,	comma, used to separate equations in a single event without ending the equation
Priority of Operators:	
0	highest
^	next
-x (unary minus)	next (e.g. y=-x^2, the ^ occurs before - )
*/^	next
+-	lowest
Logical Operators:	
and	Compares two different items. If they are both true, the event re- turns a value of 1. If both are not true, the event returns a value of 0.
or	Compares two different items. If either is true, the event returns a value of 1. If neither are true, the event returns a value of 0
<	Compares to see if one item is less than another item. If the statement is true, the event returns a value of 1. If the statement is not true, the event returns a value of 0

Logical Operators:	
>	Compares to see if one item is greater than another item. If the statement is true, the event returns a value of 1. If the statement is not true, the event returns a value of 0
<=	Compares to see if one item is less than or equal to another item. If the statement is true, the event returns a value of 1. If the statement is not true, the event returns a value of 0
>=	Compares to see if one item is greater than or equal to another item. If the statement is true, the event returns a value of 1. If the statement is not true, the event returns a value of 0
==	Compares to see if one item is equal to another item. If the state- ment is true, the event returns a value of 1. If the statement is not true, the event returns a value of 0
if(x,y,z)	Compares the value that is returned in x. If it is a true statement, the it executes the value of y. If it is untrue, then it will execute the value of z
Standard Built-in Functions:	
abs(x)	return absolute value
acos(x)	calculates arccosine
asin(x)	calculates arcsine
atan(x)	calculate arctangent
asinh(x)	calculates the hyperboloic arcsine
acosh(x)	calculates the hyperbolic arccosine
atanh(x)	calculates the hyperbolic arctangent
Cos(x)	Calculates cosine
Cosh(x)	Calculates hyperbolic cosine
exp(x)	Calculates exponential function "e to the x"
log(x), log10(x)	Calculates base-10 logarithm
log2(x)	Calculates base-2 logarithm
ln(x)	Calculates natural logarithm
max(a,b,c,d,)	Compares all variables. Returns the largest value
min(a,b,c,d)	Compares all variables. Returns the smallest value
sin(x)	Calculates sine
sinh(x)	Calculates hyperbolic sine

Standard Built-in Functions:								
tan(x)	Calculates tangent							
tanh(x)	Calculates hyperbolic tangent							
sqrt(x)	Calculates the Square Root							
sign(x)	Compares the value of x. If x is greater than 0 the event returns a value of 1. If x is less than 0, the event returns a value of $-1$ .							
rint(x)	Rounds x to the nearest integer							
sum(a,b,c,d,)	Calculates all variables. Retuns the sum of this calculation.							
avg(a,b,c,d)	Returns the mean of all variables.							
rand()	Returns a randomised value between 0 and 1							
rand2(x,y)	Returns a randomised value between x and y							
Z-Scores Variables up to 4 Channels								
ZAPXD, ZAPXT, ZAPXA, ZAPXB, ZAPX1, ZAPX2, ZAPX3, ZAPXG	channel X Absolute Power for 8 components							
ZRPXD, ZRPXT, ZRPXA, ZRPXB, ZRPX1, ZRPX2, ZRPX3, ZRPXG	channel X Relative Power for 8 components							
ZPRXDT, ZPRXDA, ZPRXDB, ZPRXDG, ZPRXTA, ZPRXTB, ZPRXAB, ZPRXAG, ZPRXBG	channel X Power Ratios for 10 ratios							
ZAAXYD, ZAAXYT, ZAAXYA, ZAAXYB, ZAAXY1, ZAAXY2, ZAAXY3, ZAAXYG	Amplitude Asymmetry between channel X and Y for 8 components							
ZCOXYD, ZCOXYT, ZCOXYA, ZCOXYB, ZCOXY1, ZCOXY2, ZCOXY3, ZCOXYG	Coherence between channel X and Y for 8 components							
ZPHXYD, ZPHXYT, ZPHXYA, ZPHXYB, ZPHXY1, ZPHXY2, ZPHXY3, ZPHXYG	Phase between channel X and Y for 8 components							
Z-Scores Functions								
ZScoreZAP(X,Y)	Retuns the Absolute Power Standard Deviation of the X Channel and Y Band							
ZScoreZRP(x,y)	Returns the Relative Power Standard Deviation of the X Channel and Y Band							
ZScoreZPR(X,Y)	Returns the Power Ratio Standard Deviation of the X Channel and Y Band							
ZScoreZAA(X,Y,Z)	Returns the Asymmetry Standard Deviation of the Z Band be- tween Channels X and Y							

Z-Scores Functions						
ZScoreZCO(X,Y,Z)	Returns the Coherence Standard Deviation of the Z Band between Channels X and Y					
ZScoreZPH(X,Y,Z)	Returns the Phase Standard Deviation of the Z Band between Channels X and Y					
PercentZOK(range), PZOK(range)	Percentage of Z scores that are within "range" of normal. Returns value between 0 and 100					
PercentZOKUL(upper, lower), PZOKUL(upper, lower)	Percentage of Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100					
PercentZAOK(range), PZAOK(range)	Percentage of ABSOLUTE POWER Z scores that are within "range" of normal. Returns value between 0 and 100					
PercentZAOKUL(upper, lower), PZAOKUL(upper, lower)	Percentage of ABSOLUTE POWER Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100					
PercentZROK(range), PZROK(range)	Percentage of RELATIVE POWER Z scores that are within "range" of normal. Returns value between 0 and 100					
PercentZROKUL(upper, lower), PZROKUL(upper, lower)	Percentage of RELATIVE POWER Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100					
PercentZPROK(range), PZPROK(range)	Percentage of POWER RATIO Z scores that are within "range" of normal. Returns value between 0 and 100					
PercentZPROKUL(upper, lower), PZPROKUL(upper, lower)	Percentage of POWER RATIO Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100					
PercentZASOK(range), PZASOK(range)	Percentage of ASYMMETRY Z scores that are within "range" of normal. Returns value between 0 and 100					
PercentZASOKUL(upper, lower), PZASOKUL(upper, lower)	Percentage of ASYMMETRY Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100					
PercentZCOK(range), PZCOK(range)	Percentage of COHERENCE Z scores that are within "range" of normal. Returns value between 0 and 100					
PercentZCOKUL(upper, lower), PZCOKUL(upper, lower)	Percentage of COHERENCE Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100					

Z-Scores Functions	_						
PercentZPOK(range), PZPOK(range)	Percentage of PHASE Z scores that are within "range" of normal. Returns value between 0 and 100						
PercentZPOKUL(upper, lower) or PZPOKUL(upper, lower)	Percentage of PHASE Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100						
PercentZCCOK(range), PZCCOK(range)	Percentage of ALL CONNECTIVITY Z scores that are within "ran of normal. Returns value between 0 and 100						
PercentZCCOKUL(upper, lower), PZCCOKUL(upper, lower)	Percentage of ALL CONNECTIVITY Z scores that are below upper limit, and above lower limit. Returns value between 0 and 100						
sLORETA Z-Scores Functions (To be used with BrainDX (optio	nal purchase), or BrainMaster (BrainAvatar Only) Z-Score DLLs						
LoretaROIZAP(ROI,Band)	Trains the Absolute Power at the chosen region of interest. The number listing of the ROI's can be found at www.brainm.com/kb/entry/461.						
LoretaROIZAPL(ROI,Band)	Trains the Absolute Power at the Left Hemisphere of the chosen region of interest. The number listing of the ROI's can be found at www.brainm.com/kb/entry/461.						
LoretaROIZAPR(ROI,Band)	Trains the Absolute Power at the Right Hemisphere of the chose region of interest. The number listing of the ROI's can be found www.brainm.com/kb/entry/461.						
PercentZBRA(range) or PZBRA(range)	Percentage of sLORETA Z Scores that are within "range" of nor- mal. Returns a value between 0 and 100						
PercentZBRAUL(upper, lower) or PZBRA( upper, lower)	Percentage of sLORETA Z Scores that are below the upper limit and above the lower limit. Returns a value between 0 and 100						
sLORETA ROI Coherence Z-Scores Functions - Requires an sL Connectivity Suite, and BrainAvatar LLP License	.ORETA Z-Score Training DLL (qEEGPro and Zbuilder only),						
LoretaROIZCoh(ROI1, Location, ROI2, Location, Band)	Trains the Connectivity Z-Scores between the chosen region of interests and its location (Left, Right, or Complete). The number listing of the ROI's can be found at www.brainm.com/kb/en-try/461.						
LoretaROIZCohL(ROI1, Location, ROI2, Location, Band)	Trains the Connectivity Z-Scores between the Left Hemisphere chosen region of interest. The number listing of the ROI's can be found at www.brainm.com/kb/entry/461.						

sLORETA ROI Coherence Z-Scores Functions - Requires an sLORETA Z-Score Training DLL (qEEGPro and Zbuilder only), Connectivity Suite, and BrainAvatar LLP License								
LoretaROIZCohR(ROI1, Location, ROI2, Location, Band)	Trains the Connectivity Z-Scores between the Right Hemisphere of the chosen regions of interests. The number listing of the ROI's can be found at www.brainm.com/kb/entry/461.							
LoretaROIZCohLR(ROI1, Location, ROI2, Location, Band)	Trains the Connectivity Z-Scores between the chosen region of interests. The number listing of the ROI's can be found at www. brainm.com/kb/entry/461.							
PercentZROICO(range) or PZROICO(range) or PercentZ- ROICoherence(range)	Percentage of sLORETA ROI Coherence Z Scores that are within "range" of normal. Returns a value between 0 and 100							
PercentZROICOUL(upper, lower) or PZROICOUL(upper, lower) or PercentZROICoherenceUL(upper, lower)	Percentage of sLORETA ROI Coherence Z Scores that are below the upper limit and above the lower limit. Returns a value be- tween 0 and 100							

#### **Designing an Event**

1. On The Event Wizard Screen, choose the Event Number that you would like to work with (For this Example, we will work with Event 1).

						Channels									
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

 Next, set the Event Condition (For this example, we are going to reward the Channel 1 Theta band, when it is greater than its threshold). There are many ways that the Event Wizard can define what is being trained (See Attached pictures). If an equation is used, the Check Equation Button must be clicked, or it will not save this.

This Event Is: © Enabled C Disabled Visibility: © Visible C Hidden	This Event Is: © Enabled C Disabled
Event Condition: Constant: Damping	Event Condition: Constant: Damping
IF: Use Equation:  Theta  Amplitude  S	IF: Channel 1:  Theta Amplitude
Check Equation x=TrnA(1,2)	Check Equation x=TrnA(1,2)
RULE: IS GREATER THAN:	RULE: IS GREATER THAN:
Use Equation:  Theta Threshold	Channel 1:   Theta  Threshold  Channel 1:
Check Equation x=TrnT(1,2);	Check Equation x=1;
Note: You must press "Check Equation" to check and save any changes made to equations	Note: You must press "Check Equation" to check and save any changes made to equations

**Event Condition with Equations** 

**Event Condition with Channels** 

3. Next, set the Event Result (For This example, if the Event Condition is met, a .wav will play. This will also Control BMrMMP).

Event R					
THEN:	Play WAV Sound 🔻	Do Nothing	-	Do Nothing	<u> </u>
		Do Nothing	~	Do Nothing	-
l	🗌 Obey Inhibits ("stops")	Control MMP Player			
			_		

4. Next, set the size of the Event Trend Graph. If you are not going to make your graph visible, you do not need to do anything with this (For this example, the graph will range from 0 to 20).

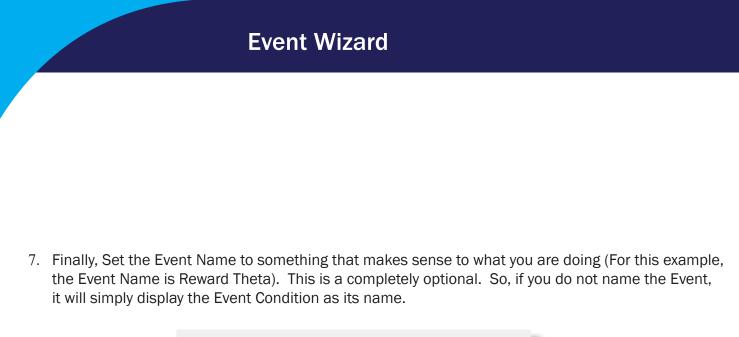

Event Trend Graph Scale Factor: 20	Offset: 0	I

5. Next, you will need to make sure, that the Event is enabled. You will also need to choose whether you would like it visible or not. If the Event is not enabled, it will not work. But, if the Event is Hidden, it will still operate. Also, if you would like the event to have a personalized name, do so now.

This Event Is:	• Enabled	0 0 11 1	Visibility:	Visible	C utildae
	. Enabled	O Disabled		<ul> <li>Visible</li> </ul>	C Hidden
E 1.0 D					

6. Next, set the Sustained Reward Criterion, Refractory Period and the properties of the MIDI Sound. If you are not utilizing a MIDI sound for a reward sound, you do not have to set this. The Sustained Reward Criterion and Refractory Period effect how often a reward can be give (For this example, the Sustained Reward Criterion and Refractory Period are both set for 500 milliseconds. This means, that a reward will not be given unless the client stays above the threshold for 500 milliseconds. Then, another reward is not possible for another 500 milliseconds).

Sustained Reward Criterion Condition must be met		Refractory Time betwe	Period een rewards is:	I
500	milliseconds	500 milliseconds		I
				J

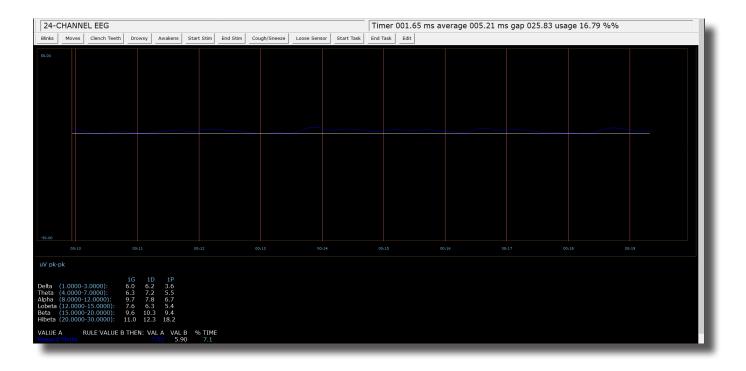

Event Name Reward Theta	

8. View the entire Event Wizard Screen to confirm that the Event is set up to your needs. When ready, click the Use Now Button, and then either move to the next Event or Close the Setup Window.

Refractory Period Time between rewards is: milliseconds ound Properties: Starting Note: 1 A (55.0) ¥ 1 to 88 Instrument; 0 Piano 1 ¥ 128 choices Playing Style: Sustained ¥ Percus. or Modulation: Amplitude ¥ Ampl. or arting Loudness: Level: 0 ¥ 0 to 128 ess Change Rate: 0 ¥ 0 to 20 at Scale (Mode): Chromatic ¥ 15 choices

ar All Events Show All Events Print All Events Copy Event Paste Event
Import Use Now OK

The Event Wizard has been set for the Client Folder. You will be able to tell this during the running of a session. If the Event was set to Visible, then you will see a graph if you choose the Display Event Trend Graph, or Wide Event Trend Graph. If you do not have the Event set to Visible, then you can still see that this is occurring through the Display Text Stat Panel. If you have placed a name for the Event, this will be reflected in the Text Stats, if you have these displayed, as well as the Thermometer Contour Display.

IF: Channel 1 Theta Amplitude IS GREATER THAN Value: 0.3 THEN: Do Nothing Logged in, device type Atlantis	Enable All Events     Disable All Events     Data Dictionary       Clear All Events     Show All Events     Print All Events       Copy Event     Paste Event       Import     Use Now     OK

The Event Threshold will now be able to be controlled through the Thermometer Contour Display, by Clicking on the Threshold indicator on the left of this Display. **\*\*\*PLEASE NOTE:** This only works with Thermometers that are displaying Events. This does not work with Thermometers that are displaying standard band values.

#### **Basic BrainMaster Setting Protocol through the Event Wizard**

#### **Standard Amplitude (Alert)**

**Event 1: IF Channel 1 Theta Amplitude IS LESS THAN Channel 1 Theta Threshold -** This gives a Graphical and Text View of the Low Inhibit Training

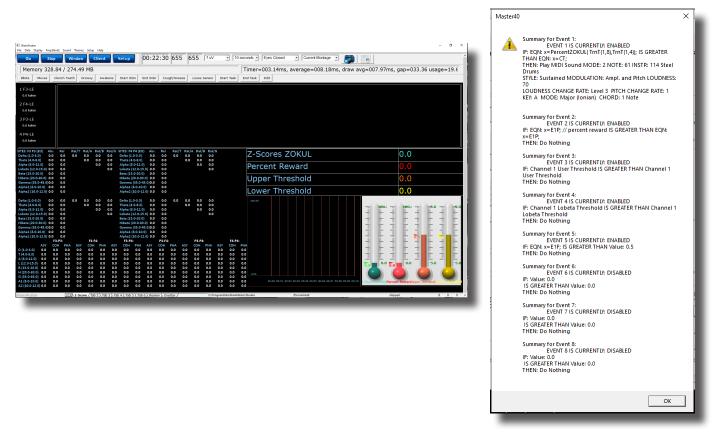

**Event 2: IF Channel 1 Beta Amplitude IS GREATER THAN Channel 1 Beta Threshold -** This gives a Graphical and Text View of the The Reward Training

**Event 3: IF Channel 1 HiBeta Amplitude IS LESS THAN Channel 1 HiBeta Threshold -** This shows the ratio of the hi "stop" inhibit to its threshold.

**Event 4: x=POINTS/100 -** This shows the points divided by 100. This is merely for the Flash Game indicator.

**Event 5: x=ALLOK -** This indicates that all components meet criteria, and the Flash Game can "move" or proceed.

#### Standard Z-Score-Based Protocol (4 Chanel PZOKUL)

**Event 1: x=PercentZOKUL(UTHR, -GTHR) IS GREATER THAN CT -** This rewards the Percentage of Z-Scores that are with-in the ranges of the Upper Threshold (U Key) and Lower Threshold (L Key)that are above the threshold that is defined by the C Key.

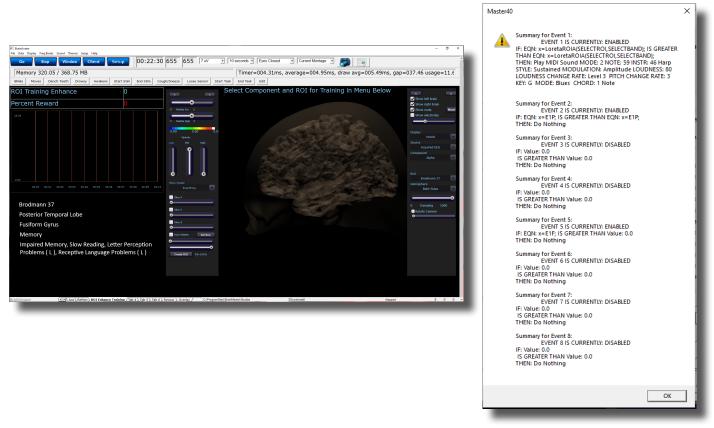

Event 2: x=E1P - This shows the percentage of reward for Event 1.

**Event 3: x=-GTHR is greater than x=-GTHR -** This gives a graphical representation for the Lower threshold for the Z-Score equation.

**Event 4: x=UTHR is greater than x=UTHR -** This gives a graphical representation for the Upper threshold for the Z-Score equation.

**Event 5: x=E1F is greater than 0.5** - This flags Event 1. When the Event 1 meets its Event Condition, Event 5 produces a 1, which indicates that this component has met criteria, and the Flash Game can "move" or proceed.

#### Z-Score-Based Protocol (4 Chanel PZOKUL)

**Event 1: x=LoretaROIA(SELECTROI,SELECTBAND) IS GREATER THAN x= LoretaROIA(SELECTROI,SELECTBAND)** - This will train the Region of Interest and the Band frequency that has been selected for viewing on ROI Head Map, and by using a damped (averaged)value of itself as the threshold creates a Dynamically changing Threshold.

Event 2: x=E1P - This shows the percentage of reward for Event 1.

**Event 5: x=E1F is greater than 0.5** - This flags Event 1. When the Event 1 meets its Event Condition, Event 5 produces a 1, which indicates that this component has met criteria, and the Flash Game can "move" or proceed.

#### **Advanced Event Wizard Controls**

#### Enabling Multiple Events to control Flash Player (2 Event Example)

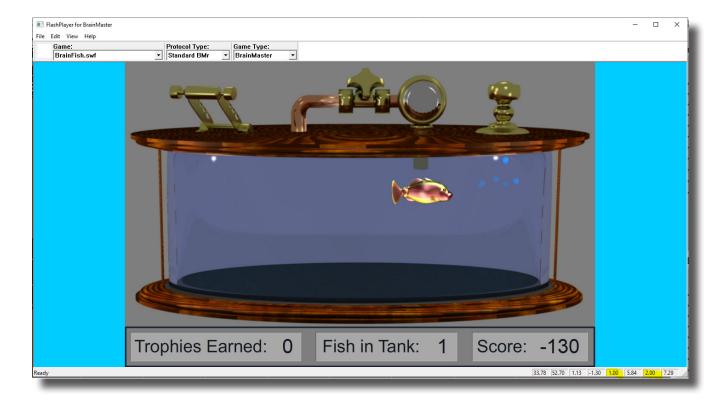

1. Create an Event (Event 7) that Flags (Whether the Event is True or False) for these Events, and requires them to be greater than the possible combination with-out all being met (For this example, since there are two Events, we want the Event Condition to be greater than 1.5. This way, we are only successful when both Event 1 and Event 2 have been met).

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 1
This Event Is: © Enabled © Disabled Visibility: © Visible © Hidden
Event Condition:     Constant:     Damping       IF:     Use Equation: <ul> <li></li></ul>
Check Equation x=E1F + E2F;
RULE:     IS GREATER THAN:     Constant:     Damping       Use Entered Value:     Delta     Amplitude     1.5     0
Check Equation x=0; Note: You must press "Check Equation" to check and save any changes made to equations

2. Next, we will need to flag the results of this last created Event into Event 5, so that the Flash Player can be controlled.

1 2 3 4 5 6 7 8 9 10 11 12 13 14	15 16 1
This Event Is:	
Event Condition:     Constant:     Dan       IF:     Use Equation:     Image: Constant:     Dan	nping
Check Equation x=E5F;	
RULE: IS GREATER THAN:	nping
Use Entered Value:  Delta  Amplitude  0.0 0	
Check Equation x=0;	
Note: You must press "Check Equation" to check and save any changes made to equations	

Your protocol will now be able to drive the Flash Player when all Event criteria has been met for the different Event Conditions. You will be able to tell, as you can see that the Flash Player will operate to Event 5, as well as seeing that Event 5 equals 1 when Event 7 equals 2.

#### **Enabling Amplitude Plus Events to control Flash Player**

1. Create an Event (Event 6) to indicate that all amplitude components have met their criteria.

1 2 3 4 5 6 7 8 9 10 11 12 13	14   15   16   1
This Event Is:       Enabled	en
Event Condition: Constant:	Damping
IF: Use Equation:   Delta  Amplitude	0
Check Equation X=ALLOK;	
RULE: IS GREATER THAN:	Damping
Use Entered Value:  Delta  Amplitude  0.0	0
Check Equation x=0;	· ·
Note: You must press "Check Equation" to check and save any changes made to equa	ations

2. Create an Event (Event 7) that Flags these Events, and requires them to be greater than the possible combination with-out all being met (For this example, since there are two Events, we want the Event Condition to be greater than 1.5. This way, we are only successful when both Event 1 and Event 6 have been met).

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 5
This Event Is:
Event Condition: Constant: Damping
IF: Use Equation:  Delta Amplitude 0
Check Equation x=E1F + E6F;
RULE: IS GREATER THAN:
Use Entered Value:  Delta  Amplitude  1.5 0
Check Equation x=0;
Note: You must press "Check Equation" to check and save any changes made to equations

268

3. Next, we will need to flag the results of this last created Event into Event 5, so that the Flash Player can be controlled.

1 2 3 4 5 6 7 8 9 10 11 12 13 14	15 16 1
This Event Is:       Enabled C Disabled      Visibility:       O Visible       Hidden	
Event Condition: Constant: Da	amping
IF: Use Equation:  Delta Amplitude	
Check Equation x=E7F;	
RULE: IS GREATER THAN:	amping
Use Entered Value:  Delta Variability 0.5 0	
Check Equation x=0;	
Note: You must press "Check Equation" to check and save any changes made to equations	\$

Your protocol will now be able to drive the Flash Player when all Event criteria has been met for the different Event Conditions. You will be able to tell, as you can see that the Flash Player will operate to Event 5

#### **Enabling Events to control Third-Party Games**

1. If the Third-Party game is a SomaticVision Game (InnerTube or Particle Editor), the BrainMaster Software has to be set into Emulation Mode. This is accomplished in the Display Options Menu under the DLL Memory Mapping Mode.

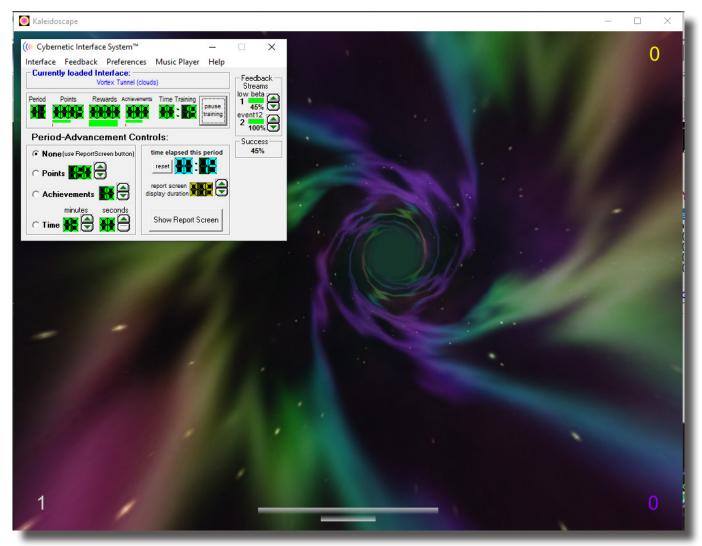

Ma	in Login   Folder Settings   Global Settings	
	(usition) [Channels   Bands   Montage   Protocol   Feedback   Session   Event Wizard   Z Scores   ROI Select   Session Wizard   Atlantis HW   Electrodes   Display	•
	quisituri   channels   banus   muntage   mutucui   recuback   sessiuri   Event witaru   z scules   not select   sessiuri witaru   Auantis ma   Electrodes   soprof	
	Phase-Space Trajectory	
	Thermometers	
	Coherence / Phase Display	
	FFT Frequency Spectrum	
	Text Stats Panel (Live)	
	Component Trend Graphs	
	Wide Event Trend Graphs PCCCCCCCCCCCCCCCCCCCCCCCCCCCCCCCCCCCC	
	Z-Score Maps (Damped)	
	Z-Score Maps (Instantaneous)	
	Sensor Impedance Values	
	Text Line DEFEFFFFFFFFFFFFFF	
emory Mapping Mode		
anory mapping mode		
Emulation Mode to use Somati	c Vision Games via Event O Standard O Emulation	
	e vision dances via Event So Standard Se Emulation	_
rd Events 9 - 16		
	Use These Settings	

2. Next we have to set the Events so that they will properly operate. This is accomplished, by utilizing Events 9-16 to emulate the Filtered Waveforms (Somatic Vision) or is just used by that software (BeyondVR). A list of the Events to what band they are referring to, see below (For this example, we are going to want the game to react to training done on the Lobeta band. Because of this, we will use Event 12). For proper reaction, the Event Condition must be Event must be met (For this example, we want the training reaction from Event 1. So, because of this the Event Condition is "IF Equation: x=E1A, is GREATER THAN Equation x=E1B"). You can do this for up to all 8 Events.

	Third-Party "Filtered
Event Number	band
9	Delta
10	Theta
11	Alpha
12	Lobeta
13	Beta
14	Hibeta
15	Gamma
16	User

You have now enabled the BrainMaster protocol to have its Events be seen as a Filtered waveband in the third-party game. You will be able to see this, by starting the third-party game, and seeing the band that you chose to affect the games reward. If this is not working, please make sure that you have set the reward for the game to the bands that you have chosen.

#### Loading a Protocol that has a Pre-Loaded Session Wizard File

1. The Process for loading a Protocol that has a Pre-Configured Session Wizard File, is no different than the process in the BrainAvatar Trainee Screen (Page 35). Pre-Configured Protocols will have both the .bdb2 file as well as a .mqt file in the same working directory. If the matching .mqt file is not located in the same directory, this will not work as expected.

The protocol will now run, with various portions of the protocol being controlled by the Session Wizard File. You will be able to tell this, as there will be a message stating the Number of periods, pauses, and total time in the session, and/or site locations being acquired or trained.

sion Wizard Basic Variables	
NAME	Defines the name of the Session Wizard Template. The name placed here, will be in view on the Session Wizard Control Screen.
VERSION	Defines what version of the Session Wizard Template. This is not displayed anywhere only in the actual Session Wizard Template
СОМ	Defines the comment of the Session Wizard Template. The comment placed here, will be in view on the Session Wizard Control Screen
NCHANS	Defines the number of channels that will be used by the Session Wizard Template.
DO	Starts the Session Wizard Template.
DONE	Ends the Session Wizard Template.
//	Classifies a comment for the user. Use to place comments your Session Wizard Template, with-out the Session Wizard seeing these comments.
BEGCYCLE	Begins an area to create a pre-defined cycle to be used in th DO section of the Session Wizard Template. The CYCLE is created outside of the DO Section.
ENDCYCLE	Ends an area to create a pre-defined cycle to be used in the DO section of the Session Wizard Template. The CYCLE is created outside of the DO section.
DOCYCLE	Used in the DO section of the Session Wizard Template. Cal to a pre-defined CYCLE with-in the Sessio Wizard Template.
ssion Wizard Session Variables	
MESG1	Displays a message before the run begins.
MESG2	Displays a message after the run ends.
SITES	Programs the run for the specific locations that will be ac- quired/trained.
PERIOD	States how long the run will be
FEEDBACK	Variable that can be used for the Session Wizard Template. This value will only be kept for the period declared.

Data Dictionary for the Session Wizard

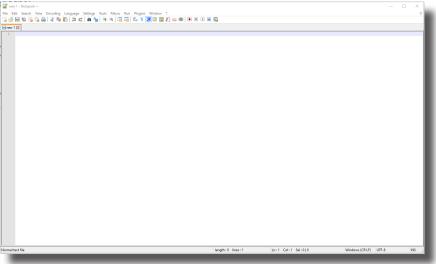

27

DUTY	Percentage Variable that controls the FEEDBACK vari- able. This allows FEEDBACK to be worth its stated value for the percentage of time of DUTY (If PERIOD is 30, FEEDBACK is 10, and DUTY is 50, then FEEDBACK=10
INTENSITY	Variable that can be used for the Session Wizard Tem- plate. This value will only be kept for the period declared.
Session Wizard Session Variables for Discovery	
EYES OPEN	Creates an EDF File with the EO mark when the PERIOD is complete.
EYES CLOSED	Creates an EDF File with the EC mark when the PERIOD is complete.
TASK	Creates an EDF File with the TASK mark when the PERI- OD is complete. You will have to declare the Task for this.
Session Wizard Session Variables for Peripherals	
PHOTICRATE	Variable that sets the rate for Photic glasses to be used for the Session Wizard Template. This value will only be kept for the period declared.
PHOTICENABLE	Enable or Disable Photic Output. 1 Enables Photic Output. 0 Disables Photic Output.

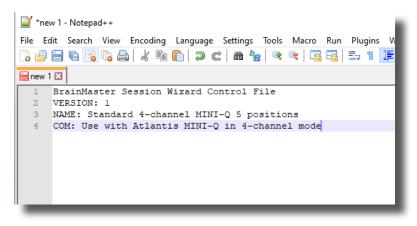

#### **Designing a Session Wizard Template**

**\*\*\*PLEASE NOTE:** A Session Wizard Template can be designed in any Notepad-based program. For this demonstration, Notepad++ is used. For more information on Notepad++, please visit <u>http://notepad-plus-plus.org/</u>.

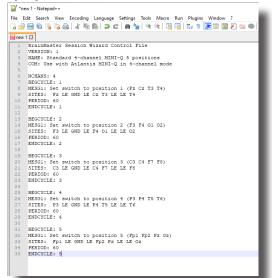

1. Open your Notepad-based program.

 Create your Header information. The Header information will contain the Line "BrainMaster Session Wizard Control File". It will also contain the Version, Name, Comment, and Number of channels.

3. Next, define the number of Training Channels that will be controlled by the Session Wizard File, as well as create any cycles that will be used.

4. Now, create the DO section of the template section of the Session Wizard Template. All that is created in the DO section will control the session. When the DO section is completed, end with DONE.

20	12A1007 00
29	ENDCYCLE: 4
30	
31	BEGCYCLE: 5
32	MESG1: Set switch to position 5 (Fpl Fp2 Pz Oz)
33	SITES: Fpl LE GND LE Fp2 Pz LE LE Oz
34	PERIOD: 60
35	ENDCYCLE: 5
36	
37	DO:
38	DOCYCLE: 1
39	DOCYCLE: 2
40	DOCYCLE: 3
41	DOCYCLE: 4
42	DOCYCLE: 5
43	DONE :
Normal t	ext file

5. When completed with you Session Wizard Template, it is now time to save it. The location that you will need to save this in for use is c:\ProgramData\BrainMaster\Settings as well as the c:\ProgramData\BrainMaster\control\swd with the exact name that matches the Settings it will be used with for use in the BrainMaster BrainAvatar Software. You will save the file as "YourSessionWizardTemplateName".mqt. If you are using a Notepad program that allows this action, no further action will be required. If you are using a Notepad program that will not support this naming, you will have to force the .mqt ending in Windows manually.

You have now created a Session Wizard Template, that can now be used for future sessions. You will be able to tell that this has been completed, by opening the Session Wizard Control Screen, and seeing your newly created Session Wizard Template ready for use. Or, by simply choosing the protocol that matches it's name.
